

AirScout™

MODEL COMPARISON

	AirScout® Live FREE	AirScout® Gigabit	AirScout® Live	AirScout® Live PRO	AirScout® Residential	AirScout® Enterprise
Description	AirScout® Live in a smaller package - including FREE Wi-Fi® analysis tools!	A single unit solution to validate Wi-Fi® and wired networks. Qualify the SLA up to 1 gig via Ethernet and test Wi-Fi® up to the theoretical max speed.	A live, single screen view of the critical components necessary to assess any Wi-Fi environment.	A more advanced version of AirScout Live with additional in-depth troubleshooting features like spectral and airtime analysis.	Quickly install, optimize, and troubleshoot. Easily communicate where customers can expect different levels of service in their homes.	Design, verify, and troubleshoot Enterprise-grade wireless networks. Requires no training or time out of the field.
Available Platforms	Android phones and some tablets	Android phones and some tablets	iPad, Windows PC, Android Tablet	iPad, Windows PC, Android Tablet	iPad, Windows PC, Android Tablet	Windows PC
