**Documentation:** All testers support automated test result upload to the included Link-Live Cloud Service for results management and reporting. Link-Live provides a way for teams to easily keep track of wired and wireless network connectivity including additional information that can be appended to each test such as jack location to document the connection path to switch slot/port/VLAN, and even photos of end device attributes such as serial number, asset tag, QR/Barcode, etc.

Products are available in Combos, Packs and Kits to help you and your team deploy the right technology across your team. Visit the product web pages to learn more about these offerings, options and accessories and even **take a virtual test drive**. <http://enterprise.netscout.com/industries/handheld-network-test-solutions>

**Don't forget to add Gold Support for your products!** As a Gold member, you are entitled to the advanced technical support you need to fully troubleshoot the complexities of your network plus your registered equipment will always be up-to-date with the latest software releases. 3-year Gold provides a 10% discount off current Gold pricing.
