

THE TRIED-AND-TRUE 701K-G TONE & PROBE KIT FROM TEMPO

FEATURING THE 200EP
PROBE & 77HP TONER.

WORKING TOGETHER TO SOLVE YOUR WIRE TRACING NEEDS.

The 701K-G delivers everything you love from the people who were previously known as Progressive Electronics and Greenlee Communications. With a new, more vibrant color scheme, Tempo's 701K-G Kit remains the industry standard for tracing voice, data, and video wiring.

Tempo's tone and probe tracing kit allows professional technicians to identify wires from a bundle, monitor voltage passing through the circuit, check breaks in the circuit and trace wires through walls. The 77HP tone generator injects a signal onto the cable to be traced and the 200EP-G tracing probe helps you follow the wire—combining to create the perfect wire tracing partnership!

TRACE FASTER.

Clear warble tone allows you to trace telephone, data, and security cables faster.

WORK EASIER.

Easier signal strength viewing and three listening modes: speaker, headset, or butt-in telephone.

STAY SAFE.

Enhanced voltage protection (up to 150 V DC).
