# 1 Introduction

## 1.1 Thanks for Purchasing IP652

Thank you for purchasing IP652. The IP652 which has 5 lines is a full-featured VoIP (Voice over Internet Protocol) phone that provides voice communication over an IP network.

This phone functions not only much like a traditional phone, allowing to place and receive calls and enjoy other features that traditional phone has, but also it own many data services which you could not expect from traditional telephone.

The IP652 provides **Power over Ethernet (PoE)** and two Ethernet ports for connecting another device to the local area network.

This guide will help you easily use the various features and services available on your phone.

## 1.2 Package Contents

Your package includes the following:

- ◆ One IP652 (with PoE) IP Phone Unit
- ◆ Handset and handset cord
- ◆ Headset
- ◆ One universal power adapter
- ◆ One Ethernet cable
- ◆ Wall-mounting screw pack

## 2 Installing

### 2.1 Assembling the Phone and Connecting to the Network

- 1) Plug one end of the coiled phone cord into the left side of the phone base.
- 2) Plug the other end of the handset cord into the jack at the bottom of the handset.
- 3) If you are using an external power source, push the power cord into the power supply, and plug the power supply into the phone base unit.

**Note: Use only the power supply that came with the phone.**

- 4) Plug the Ethernet cable into **Internet port** in the rear side of the base station. Plug the other end of the Ethernet cable into your already prepared network connection.

### 2.2 Mounting the Phone to the Wall

- 1) Complete the assembly instructions.
- 2) Attach two appropriate screws to the wall. Leave 1/4 distance from the wall. This allows you to slide the mounting brackets on to the screws.

Push down slightly to lock the phone in place.

### 2.3 Turning on the Phone

This section assumes that the correct connections have been made.

- 1) Check whether the Internet port is well connected.
- 2) Plug the AC power adapter into the electrical outlet.

**Note: Use only the adapter that came with the phone.**

- 3) The LCD will firstly display “**Welcome, initializing.....**” and all of the lights on the phone will flash.
- 4) Next, the LCD display “**Initializing Network**”.
- 5) After the sequence, the phone will display the Internet port IP address, date & time, lines status for the phone, and IP652 is started normally.

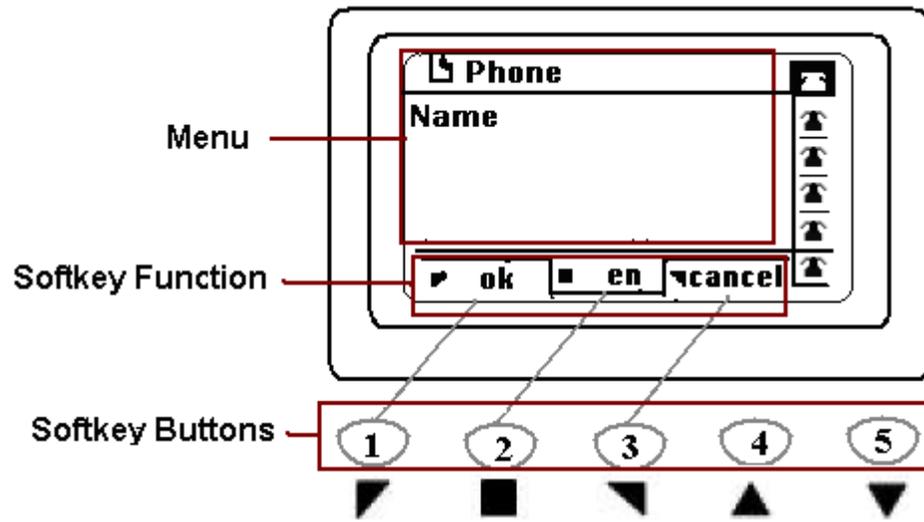

**Note: If the phone does not provide this screen, re-confirm installation and connections. If these are incorrect, try unplugging the phone and plugging it back in again. If you still don't see the display, then contact your Phone Administrator or service provider.**

## 3 Get Familiar with IP652

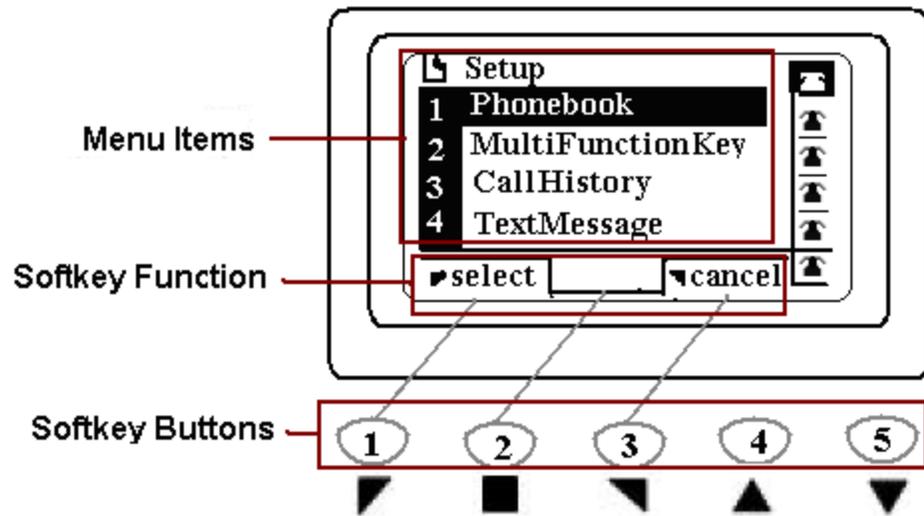

### 3.1 Front Panel

| Front Panel | No. | Part Name               | Description of function  |
|-------------|-----|-------------------------|--|
|             | 1   | Handset top cradle      | For the placement of handset (Receiver end)  |
|             |     | Hook switch             | For hang-up and hang-off of handset  |
|             |     | Cradle latch            | To prevent the handset from dropping when it is wall-mounted.  |
|             |     | Handset bottom cradle   | For the placement of handset (Transmitter end)   |
|             |     | Handset cord port       | RJ-11 jack on the left side of the IP phone  |
|             |     | Headset wire port       | RJ-11 jack on the bottom of the handset  |
|             |     | Headset                 | To mount mouthpiece and earpiece on the single handle.   |
|             | 2   | LCD screen              | The LCD screen is for displaying your settings, such as IP address of Internet port, phone number, and call status and so on.  |
|             | 3   | Multi-Functional Key    | These keys can be used as speed dial, BLF, shortcut key, pick up and call park.  |
|             | 4   | Line Keys/<br>Soft keys | <p><b>In standby:</b><br/>These keys are used as line keys; you can press the line button to select the corresponding line, and then user can make call or do other functions. The LEDs under the keys used to display the status of each extension, please refer to <b>3.3 LCD indicator</b></p> <p><b>When configuration from Menu:</b><br/>In this status, these keys are used as soft keys. These can be used for item selection or control on the LCD screen.<br/>The first three soft keys' function</p> |

Picture 3

depends on their corresponding content displayed on the LCD at that time.

The softkey  is a left softkey button; press it to realize the left softkey function.

The softkey  is a middle softkey button; press it to realize the middle softkey function.

The softkey  is a right softkey button; press it to realize the right softkey function.

The softkey  is an up softkey button; press it to scroll up the items or turn up the function.

The softkey  is a down softkey button; press it to scroll down the items or turn down the function.

**In picture 2:**

Press the softkey  to choose **ok**.

Press the softkey  to choose **en** (this is used to change the input method between digit, capital letters and lower case; **en** stands lower case, **EN** stands capital letter, and **num** stands digit).

Press the softkey  to choose **cancel**.

**In picture 3:**

Press the softkey  to choose **select**.

No choice about softkey .

Press the softkey  to choose **cancel**.

Press softkey  to scroll up to

**20Login/logout.**

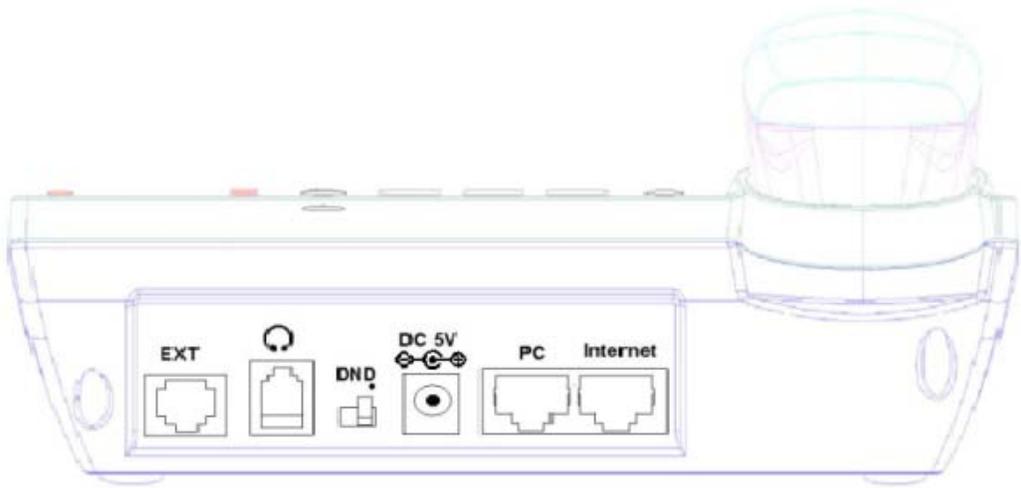

Press softkey  to scroll down to

**2MultiFunction Key.**

|   |                     |   |
|---|---------------------|---|
| 5 | MSG                 | <ul style="list-style-type: none"> <li>✧ The key can be used for voicemail selection, press it to access voicemail (must be set up by your phone administrator)</li> <li>✧ The LED is to indicate voicemail status. Please refer to <b>3.3 LCD indicator</b></li> </ul> |
|   | Menu                | Press it to access to menu items: such as phonebook, multi-functional key, and call history and so on.  |
|   | Redial              | The Redial key is used to redial the last dialed number automatically.  |
|   | Handsfree / Headset | <ul style="list-style-type: none"> <li>✧ This button has two operating mode: <b>Handsfree</b> and <b>headset</b>.</li> <li>✧ Default is in <b>Handsfree</b> mode.</li> </ul>  |

|          |          |   |  |
|----------|----------|---|--|
|          |          |   | <ul style="list-style-type: none"> <li>✧ You can change the mode by change the value of <b>Handsfree Key Mode</b> parameters in <b>Phone/Preference</b> webpage, <b>Miscellaneous</b> columns.</li> <li>✧ The LED associated is used to indicate its status; you can refer to <b>3.3 LED Indicator</b>.</li> </ul> |
|          | <b>6</b> | Numeric Keypad  | Enters numeric digits for initiating a call or for entering configuration information.   |
|          | <b>7</b> | XFER  | The Transfer key is used to transfer a call to another IP phone.   |
|          |          | Hold  | The Hold key is used to hold the current call, press it again to release the hold function.  |
|          |          | CONF  | The Conference key is used to add the current multiple connected phones into a conference. It performs a phone-bridging function.  |
| Mute/Del |          | <ul style="list-style-type: none"> <li>✧ During an active call, press it to mute the current call.</li> <li>✧ When input text, press it to delete a digit or number.</li> </ul> |  |

## 3.2 Rear Panel

| Rear Panel   | Part Name  | Description of function  |
|--|------------|--|
|  | EXT        | Attended console connect to expansion modules  |
|  | Headset    | Headset console, connect to headset  |
|  | DND Switch | The Switch is used to turn on or turn off DND. Under the character DND is a dot. When the switch near the dot, DND is on; when away, DND is off. Taking the left picture for example, DND is on. |
|  | DC 5V      | Power port   |
|  | PC         | Connects to a PC.  |
|  | Internet   | Connects to the Ethernet switch, router or Internet.   |

## 3.3 LEDs Indicator

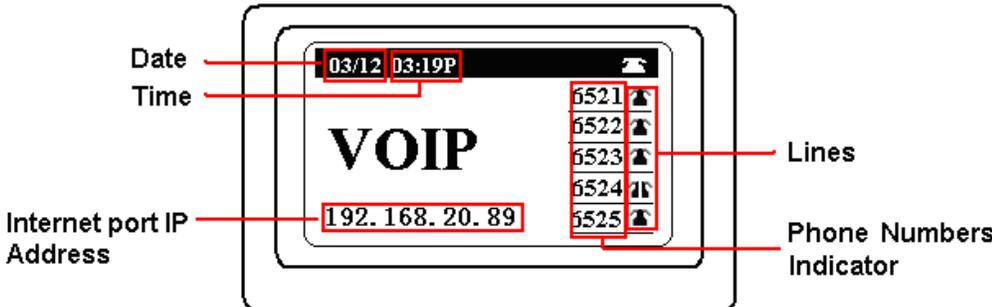

| LED   | Color | Status          | Description                        |
|---|-------|-----------------|------------------------------------|
| MSG   | ○     | OFF             | In-active                          |
|   | ●     | Blinking Green  | An new voicemail                   |
|   |       | Solid Green     | No new voicemail                   |
| <br>VoIP Lines 1/2/3/4/5 | ○     | OFF             | Line disable                       |
|   | ●     | Solid Light Red | Not registered                     |
|   | ●     | Solid Green     | Registered, line is in standby     |
|   | ●     | Solid Red       | Registered, line is in active call |
|   |       | Blinking Red    | New call incoming                  |
| Handsfree/Headset   | ○     | OFF             | Standby                            |

## 4.2 How to configuration from Menu

- 1) When the phone is on-hook, press the **MENU** button to enter Main menu.
- 2) Use the **Numeric Keypad** to input the digit or character
- 3) Press the **■** softkey to change the input method between digit, capital letter and small letter.
- 4) Use the **up▲** and **down▼** softkey to scroll up and down. Configuration the item or sub-item according to the prompt.

- 5) Press the **✓ok softkey button** to confirm.
- 6) Press the **■save softkey button** to save changes.
- 7) Press **MUTE/DEL** button to delete one digit or a character.
- 8) Press the **✗cancel softkey button** to cancel changes and back to the up level.
- 9) The password access to item is the same as the one of admin mode when login Web, default is null.

## 5 Using Basic Phone Function

### 5.1 Using the Handset/ Speakerphone/ Headset

#### 5.1.1 Using the Handset

To place and answer calls using the handset, simply lift the handset.

#### 5.1.2 Using the Speakerphone

To place and answer calls using the speaker, press the **speaker/headset** button. The green light behind the button will illuminate.

#### 5.1.3 Using the Headset

To use headset, you should enable it firstly with the following steps :

Step 1. Login to the webpage and then open **Phone/Preference** webpage, **miscellaneous** column

Step 2. Find **Handsfree key Mode** parameters, choose headset from the drop-down list.

Miscellaneous

|                   |           |                          |             |
|-------------------|-----------|--------------------------|-------------|
| Auto Answer:      | Disable ▼ | Auto Answer by CallINFO: | Disable ▼   |
| Dial Time Out:    | 5         | Call Immediately Key:    | # ▼         |
| ICMP Ping:        | Disable ▼ | Preferred Audio Device:  | Handsfree ▼ |
| Auto Hookon Mode: | Enable ▼  |                          |             |

Step 3. Press **Save Settings** button to save.

Step 4. To place and answer calls using the headset, press the **speaker/headset** button. The green light behind the button will illuminate.

## 5.2 Making Telephone Call

### 5.2.1 Place a Call

You can place a call by:

1. Lifting the handset and dialing phone number, followed by the # or wait 5 seconds, IP652 will dial out the phone number
2. Connect the headset, enable headset like 5.1.3, press the headset button and dial phone number, followed by the # or wait 5 seconds, IP652 will dial out the phone number
3. Press the speaker button and dial phone number, followed by the # or wait 5 seconds, IP652 will dial out the phone number

## 5.2.2 Using Redial Button

To redial the last number called:

Lift the handset or press speakerphone, and then press the **redial** button, the number will be automatically dialed.

## 5.2.3 Dialing from Phonebook

### Adding a phonebook

Below are the steps to add a phonebook in menu, User can also add phonebooks from you PC using IP652 Web Interface.

- 1) Press **MENU** button access to the menu items, and use the soft key button to choose **1.Phonebook**,
- 2) Add one phonebook according to the prompt, press the **■softkey button** to change the input method between digit, capital letter and small letter.

### Using phonebook:

Press **MENU** button to access to the menu items, and use the soft key button to choose **1.Phonebook**, and then highlight the phonebook you want to call, press the **▼dial softkey button** to make call immediately.

## 5.2.4 Dialing from Call History

Press **MENU** button access to the menu items, and use the **▲up** and **▼down softkey button** to choose **3.CallHistory**, and then highlight the phone number you want to call, press the **▼dial softkey button** to dial immediately.

## 5.2.5 Using Speed Dial

### Adding a speed dial:

Below are the steps to add a speed dial from menu, User can also set speed dial from you PC using IP652 Web Interface.

- 1) Press **MENU** button access to the menu items, and use the ▲**up** and ▼**down softkey button** to choose **2. Multi-Function Key**
- 2) Configuration one **Multi-Function Key** to speed dial according to the prompt.

### Making speed dial:

Press the speed dial key to make call immediately.

## 5.2.6 Using Dial Plan

### Adding one dial plan:

- 1) Open **Phone/Dial Plan** webpage
- 2) Add one dial plan, user can refer to **7.6.3 Dial Plan**

### Using dial plan to make call:

Dial the phone number according to one dial plan.

## 5.2.7 Using Delayed hotline

Add the delayed hotline from **SIP Account/Account1/2/3/4/5** webpage, **Supplementary Services** column, below is one example:

Step 1. Open **SIP Account/Account1/2/3/4/5** webpage, **Supplementary Services** column

Step 2. Fill in the delayed hotline number, user can also add the delayed time.

Example 1: Delayed Hot Line:  set the delayed hotline number is 111.

Example 2: Delayed Hot Line:  set the delayed hotline number is 111 and delayed time is 4 seconds.

## 5.2.8 Answering a Telephone Call

When a call is incoming, the associated line button will flash and the phone will ring.

**You can receive the call by:**

- 1) Pressing the corresponding line button or
- 2) Pressing the speakerphone, or
- 3) Lifting the handset, or
- 4) Auto-answer: if auto-answer is enable, IP652 will answer the phone automatically when there is a call incoming

**Enable auto-answer:** press **MENU** button to access to the menu items, then use the **up▲** and **down▼** softkey to choose **6Reference**, set auto-answer enable according to the prompt.

**Note:** user can also enable auto-answer in **Phone/Preference** webpage, **miscellaneous** column.

## 5.3 Adjusting Call Volume

**From menu:**

Step 1. Press **Menu** button, and then choose **volume**.

Step 2. Press **up▲** and **down▼** softkey to turn up or turn down volume.

**Using multi-functional key:**

Step 1. Choose two multi-functional key (assuming the two multi-functional keys are Exp Key 1 and Exp Key 2), and configuration as follows:

| Key      | Type            | Mode      | Line    | Expansion | Pickup Code |
|----------|-----------------|-----------|---------|-----------|-------------|
| Exp Key1 | Shortcut Keys ▼ | Volume+ ▼ | Line1 ▼ |           |             |
| Exp Key2 | Shortcut Keys ▼ | Volume- ▼ | Line1 ▼ |           |             |

Step 2. Press **Save Settings** to save changes and user can see the corresponding LED is solid green.

Step 3. Press the **Exp Key1** button to turn up volume, press the **Exp Key 2** button to turn down volume.

## 5.4 Black List

If user added a black list, IP652 will forbid the phone number incoming.

### Adding a black list:

There are two ways to add black list, one is from menu, and the other is from your PC to use IP652's webpage.

#### From menu:

- 1) Press **Menu** button, and then choose **5black list**.
- 2) Choose **NewEntry**, and then add one black list according to the prompt.

#### From Webpage:

- 1) Log on the web, open **Phone/Phonebook** webpage, **Black List** column.
- 2) Refer to the **7.6.4.1 Black List** to add blacklist.

## 5.5 Muting a Call

During an active call, pressing the **MUTE/DEL** button to mute the handset, headset or speakerphone. This prevents the person on the active call from hearing what you or someone else in the room is saying; and the MUTE icon at the right side of LCD is on.

To cancel the Mute function, press the **MUTE/DEL** button again and the MUTE icon at the right side of LCD is off.

## 5.6 Placing a Call on Hold

### When IP652 is during one active call:

- 1) Pressing the **hold** button to put the active call on hold, then you will hear a dial tone, the remote party will hear the hold music
- 2) User can input the phone number to make call

- 3) Pressing the **hold** button again to release the previously Hold state and resume the bi-directional media.

## 5.7 Three Way Conference Calls

- 1) To initiate a conference call, press the **HOLD** button during an active call and the first call is placed on hold, and you will hear a dial tone.
- 2) Dial the second person's telephone number
- 3) After the second person answers the call, press **CONF** button to start the conference call; all three parties will be participating in a conference call.
- 4) If you hang up firstly, the other two parties will be disconnected; if one party hangs up firstly, you can go on talking with the other party.

## 5.8 Attended Transfer

You call the person to whom you are transferring the call and speak to them before transferring the call:

- 1) To initiate a transfer, press the **HOLD** button during an active call. This places the first call on hold and you will hear a dial tone.
- 2) Dial the second person's telephone number.
- 3) When the second person answers, you can have a private conversation with the second person without the first person hearing it.
- 4) To connect the call to the second person, press the **XFER** button to complete the transfer. You will be disconnected from the call.
- 5) If you hang up during the call with the second person before pressing **XFER**, the transfer is not completed; this only ends the call with the second person, and you can press the **HOLD** button to continue the first call.

## 5.9 Unattended Transfer

You can transfer an active call to a third party without announcement.

- 1) To initiate an unattended (blind) transfer, press the **XFER** button during an active call. The first call is placed on hold and you will hear a dial tone.
- 2) Now dial the second person's telephone number with immediately ending char "#", IP652 will transfer phone automatically and you will be

disconnected from the call.

## 5.10 Forwarding Calls

You can forward all calls, forward calls when the phone is busy or forward calls when there is no answer.

Below are the steps to configuration call forward from menu. You can also set call forwarding options from your PC using the IP Phone Web Interface.

### From menu:

- 1) Press the **MENU** button.
- 2) Select **10Call Forward** and choose one type of call forwarding.
  - CFWD All Number—Forwards all calls to a single number immediately when there is an incoming call.
  - CFWD Busy Number—Forwards all calls to another number when the phone is busy.
  - CFWD No Ans Number—Forwards calls to another number if there's no answer at your phone.
  - CFWD No Ans Delay—the seconds to delay forwarding calls, if there is no answer at your phone.
- 3) Fill in the call forwarding number.
- 4) Press the **■save softkey button** to save changes.

## 5.11 Call Waiting

Before using call waiting, you should enable it firstly, and default is enabling.

### During an active call:

- 1) If call waiting is enabled, call waiting alerts you with ringing if there is another call is incoming, and the associate line button will change to red blinking, press the line key of the second call to answer the second call with the first call holding, pressing the line button of the first call to back to the first call with the second call holding.
- 2) If the call waiting is off, new calls would be rejecting and the new caller will hear busy tone when you are on

another call.

### Enable Call Waiting:

You can turn call waiting on or off from menu in **Menu/6References** item.

And user can also enable call waiting by using your PC to open **SIP Account/Account X (1/2/3/4/5)** webpage, **Supplementary Services** column.

## 5.12 Ending a Call

To end a handset call, hang up the handset.

To end a speakerphone call, press the speaker button.

To end a headset call, press the headset button.

## 5.13 Viewing and Returning Missed Calls

The LCD screen on your IP phone will notify you like the following picture if a call came in that was unanswered.

### To return a missed call:

- If the LCD screens shows a missed call:

Step 1. press the **softkey button under miss** to view the call.

Step 2. Press the **softkey button under dial** to return the missed call.

- If the LCD screen does not show a missed call, you can return a call from the Missed Call list:

Step 1. Press the **Menu** button.

Step 2. Then selects **3Call History**.

Step 3. Then selects **Missed Calls**.

Step 4. Choose the call you want to return and press Dial.

**To view a list of all missed calls:**

- If the LCD screen shows a missed call, press the **softkey button under miss** to view a list of missed calls.
- If the LCD screen does not show a missed call:

Step 1. Press the **Menu** button.

Step 2. Then selects **3Call History**.

Step 3. Then selects **Missed Calls**.

## 5.14 Text Message

### 5.14.1 Sending Message

- 1) Press **Menu** button, and then choose **4Text Message** by using the **▲ up softkey button** or the **▼ down softkey button**.
- 2) Press the **▼ select softkey button** to enter to **1SEND** item.
- 3) Press the **▼ select softkey button** to edit message.

**Note:** When inputting text, use the **■ en softkey button** to change the input method among numbers, capital and lowercase English letters, **en** stands lower case, **EN** stands capital letter, and **num** stands digit

- 4) Press the **▼ ok softkey button** to input **receivers' phone number**.

**Note:** IP652 support group mails, user can send one message to 10 friends or family one a time;

Press the **▼ ok softkey button** to access to configuration the next receiver's phone number;

You can select one number in phonebook by pressing the **■ pbook softkey button**.

If user has configuration the phone numbers which you want to send, press the **▼ ok softkey button** twice to access to the next item (**Sender number**).

- 5) Set Sender phone number, default is line1's phone number.
- 6) Press the **select softkey button** to send message.

## 5.14.2 Reading Message

- 1) Press **Menu** button, and then choose **Text Message** by using the **up softkey button** or the **down softkey button**.
- 2) Press the **select softkey button** to enter to **Received Box** item or **Sent Box** item.

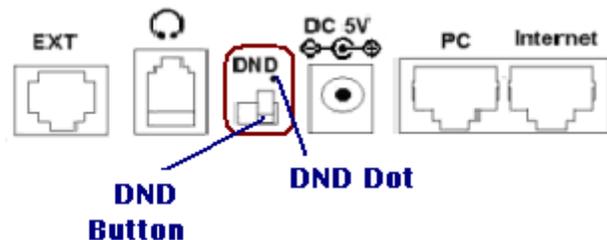

Note: In Received Box are messages have received from others including new messages and old messages. The ones in Sent Box are messages have sent out.

- 3) Press the **select softkey button** to access to the next item. Choose the message you want to read by using the **up softkey button** or the **down softkey button**.

## 5.15 DND (Do Not Disturb)

Use the Do Not Disturb feature to prevent incoming calls from ringing your phone.

To enable Do Not Disturb, push the DND button to the side near the DND dot, below is one picture:

## 6 Using Advanced Phone Functions

### 6.1 Speed Dials

#### Creating Speed Dials:

Following are the steps to creating speed dials in webpage; you can also creating it from LCD Menu.

- 1) Access to web, and then open **Phone/Multi-Functional Key** webpage
- 2) Then configures one Exp key to speed dial, and then choose the line and fill in the phone number. The following picture is a setting example:

| Key       | Type       | Mode | Line   | Expansion | Pickup Code |
|-----------|------------|------|--------|-----------|-------------|
| Exp Key 1 | Speed Dial |      | Auto   | 111       |             |
| Exp Key 2 | Speed Dial |      | Line 2 | 112       |             |

- 3) Press **Save Settings** button to save changes and then press **Reboot** button to make changes effective.

#### Using Speed Dials:

- 1) Press the configured Exp Key 1 to call 111 or press Exp Key 2 to call 112 immediately.

### 6.2 BLF (Busy Lamp Field)

Your system administrator may configure your phone so that you can monitor other user's phones from your phone. User can create BLF from **Menu/Multi-functional key** or from your PC in **Phone/Multi-Functional Key** webpage.

If this feature is configured, some multi-functional key buttons on your phone are assigned to display the status of another user's phone. For example, if your one multi-functional key is configured to display Bob's phone line, the associate multi-functional key shows you the status of his phone line:

- ◆ Green: Line is idle.
- ◆ Red (steady): Line is active or in use.
- ◆ Red (blinking): Line is ringing.

In addition, if you have configured the pickup code in BLF, you can press the same multi-functional button to pick up a ringing call at his extension. Moreover, BLF has the function as the same as Speed dial. By pressing BLF function key, your Iphone will make a call towards expansion number.

The example below describes the steps to configuration the pickup in BLF from Webpage, user can also configuration from **MENU**.

### Configure the pickup code in BLF:

- 1) Access to web, and then open **Phone/Multi-Functional Key** webpage
- 2) Then configures one Exp key to BLF, and set **Pickup Code** (you can get the pickup code from your administrator). The following picture is a setting example based on Asterisk
- 3) Press  button to save changes and then press  button to make changes effective.

| Key      | Type | Mode      | Line  | Expansion | Pickup Code |
|----------|------|-----------|-------|-----------|-------------|
| Exp Key1 | BLF  | Phonebook | Line1 | 233       | 233         |

### To pick up a ringing call:

- 1) Assuming a ringing call at **003** and the associate LED is blinking.
- 2) Press  **line3 button**, and then press the **Exp key 1** button to pick up the call.

### To speed dial a call using BLF function:

- 1) Fill the blank of Expansion and save settings.
- 2) Pressing the corresponding multifunctional key. The phone will make a call to expansion number.

## 6.3 Shortcut Key

The steps below described how to configuration the shortcut key from Webpage, user can also configuration from **MENU**.

### Creating Shortcut Key:

- 1) Access to web, and then open **Phone/Multi-Functional Key** webpage

2) Then configures the Exp keys to shortcut key, and set as you need. The following picture is a setting example:

| Key       | Type         | Mode         | Line | Expansion | Pickup Code |
|-----------|--------------|--------------|------|-----------|-------------|
| Exp Key 1 | Shortcut Key | Phonebook    |      |           |             |
| Exp Key 2 | Shortcut Key | Call History |      |           |             |
| Exp Key 3 | Shortcut Key | Text Message |      |           |             |
| Exp Key 4 | Shortcut Key | Volume +     |      |           |             |
| Exp Key 5 | Shortcut Key | Volume -     |      |           |             |
| Exp Key 6 | Shortcut Key | Login/Logout |      |           |             |

3) Press  button to save changes and then press  button to make changes effective.

### Using shortcut Key:

Press the Exp Key 1, then the LCD will display the phonebook item immediately, and user can configuration it, the steps are same as configuration from menu.

Press the next Exp Keys, and the LCD will display the corresponding item immediately, and user can also configuration it.

## 6.4 Pickup

The function of pickup is similar to the speed dial.

The example below describes the steps to configuration the pickup from Webpage, user can also configuration from **MENU**.

### Adding pickup:

- 1) Log in the web, open **Phone/Multi-functional Key** webpage.
- 2) Choose one Exp key (assuming is Exp Key 18), and configuration as follows, user can refer to **7.6.2 Multi-functional Key**:

|            |             |  |        |     |  |
|------------|-------------|--|--------|-----|--|
| Exp Key 18 | Call Pickup |  | Line 1 | 112 |  |
|------------|-------------|--|--------|-----|--|

3) Press  button to save changes and then press  button to make changes effective.

### Using pickup:

Press the **Exp Key 18** button (the configured multi-functional key) to ring 112 quickly.

## 6.5 Call Park

Call Park is a feature of some telephone systems that allows a person to put a call on hold at one telephone set and continue the conversation from any other telephone set.

During an active call, pressing one preprogrammed multi-functional key button to transfer the current telephone conversation to an unused extension number and immediately puts the conversation on hold. The telephone system will then display the extension number of the parked call so that the call can later be retrieved.

If no one picks up the parked call within the set time, the telephone system may ring back the parked call. This transfers the parked call back to the person who originally parked the call.

The example below describes the steps to configuration the call park from Webpage, user can also configuration from **MENU**.

### Adding Call Park:

- 1) View the parking settings in server, below is a example in **TrixBOS**

### Parking Lot Configuration

#### Parking Lot Options

|                            |  |
|----------------------------|--|
| Enable Parking Lot Feature | <input checked="" type="checkbox"/>      |
| Parking Lot Extension:     | <input type="text" value="70"/>          |
| Number of Slots:           | <input type="text" value="8"/>           |
| Parking Timeout:           | <input type="text" value="45 seconds"/>  |
| Parking Lot Context:       | <input type="text" value="parkedcalls"/> |

- 2) Log in the web, open **Phone/Multi-functional Key** webpage.
- 3) Choose one Exp key (assuming is Exp Key 6), and configuration as follows, user can refer to **7.6.2 Multi-functional Key**:

|           |  |                                     |                                 |                               |
|-----------|--|-------------------------------------|---------------------------------|-------------------------------|
| Exp Key 6 | <input type="text" value="Call Park"/> | <input type="text" value="Line 1"/> | <input type="text" value="70"/> | <input type="text" value=""/> |
|-----------|--|-------------------------------------|---------------------------------|-------------------------------|

- 4) Press  button to save changes and then press  button to make changes effective.

### Using Call Park:

- 1) During an active call (assuming party 1(IP652)'s phone number is 6521, party 2's phone number is 111)
- 2) Party 1 press the **Exp Key 6** button (the configured multi-functional key) to park the current conversation and listen the voice prompt patiently,
- 3) Party 3 dialing **71** using another phone to retrieve the call with party 2.

## 6.6 MSG

Voice Mail service must be available on your network to use this feature.

### 6.6.1 Enable and configuration MSG

There are two ways to enable MSG, one is from menu, and the other is from your PC to use IP652's webpage.

#### From Menu:

- 1) Press **Menu** button to enter menu items and then choose **12Voice Mail**
- 2) Highlight the line you want to configuration, and then select it
- 3) And then use the **softkey buttons** to configuration it according to the prompt
- 4) Press the **save softkey button** to save the changes

#### From Webpage:

- 1) Log into Web, open **Account X (1/2/3/4/5) /User webpage**.
- 2) Enable **MWI Enable** and fill in the **Voice Mailbox Numbers** (get the number from your phone administrator), below is a settings example based on Asterisk.

| User                          |                                     |                        |                                  |
|-------------------------------|-------------------------------------|------------------------|----------------------------------|
| <b>Call Forward</b>           |                                     |                        |                                  |
| Cfwd All Dest:                | <input type="text"/>                | Cfwd Busy Dest:        | <input type="text"/>             |
| Cfwd No Ans Dest:             | <input type="text"/>                | Cfwd No Ans Delay:     | <input type="text" value="20"/>  |
| <b>Supplementary Services</b> |                                     |                        |                                  |
| Call Waiting:                 | <input type="text" value="Enable"/> | Delayed Hot Line:      | <input type="text"/>             |
| Dial Prefix:                  | <input type="text"/>                | Voice Mailbox Numbers: | <input type="text" value="*97"/> |
| MWI Enable:                   | <input type="text" value="Enable"/> |                        |                                  |

- 3) Press  button to save changes, then the notice **Please REBOOT to make the changes effective!** will appear, press  button to make changes effective.

## 6.6.2 Using MSG

To access you voice mail box, press the **MSG** button.

Then user can listen to the new voice mail or old voice mail or reply voice mail according to the voice prompt.

## 6.7 Changing the LCD Screen Contrast

- 1) Press the **Menu** button, scroll to **19LCD Contrast**, and press the **▼Select softkey button** to access.
- 2) Use the **▲up** and **▼down softkey buttons** to adjust the screen contrast. Pressing the **▲Up softkey** button to increase the contrast. Pressing the **▼Down softkey** button to decrease the contrast.
- 3) Press the **▼save softkey button** to save.

## 6.8 Changing Language

- 1) Press the **Menu** button, scroll to **6Preference**, and press the **▼Select softkey button** to access.
- 2) Choose **1Language** and press **▼Select softkey button**.
- 3) Choose **English** or **Russian** and press **▼Select softkey button**. Then the menu will automatically exit. The corresponding language will display.

## 6.9 Changing Your Ring Tone

**To change a ring tone:**

- 1) Press the **Menu** button.
- 2) Select **Ring Tone**.
- 3) Use the **▲up** and **▼down softkey buttons** to highlight the ring tone. Press the **▼select softkey button** to choose the highlighted ringtone.

## 6.10 Setting Your Phone's Date and Time

The date and time for your phone normally come from the phone server. However, if you need to change some date and time parameters, you can follow these steps:

- 1) Press the **Menu** button, select **Time/Date**.
- 2) Choose **date** to adjust date, enter the date in the following format: **mm/dd/yy**.
- 3) Choose **time** to adjust time, enter the time in the following format: **hh/mm/ss**.
- 4) Press the **▼ok softkey button** to save the changes.

## 6.11 Rebooting Your Phone

This setting is to configure and troubleshoot the network. You should not change these settings unless directed to by your Administrator as this can negatively affect your phone's function.

**To reboot your phone:**

- 1) Press the **Menu** button.
- 2) Scroll to **16Reboot**; press the **▼select softkey button** to access to reboot item.
- 3) Then a notice “**Confirm System Reboot**” will appear, press the **▼ok softkey button** to confirm rebooting.

## 6.12 Factory default

There two ways to make factory default: in menu and using website.

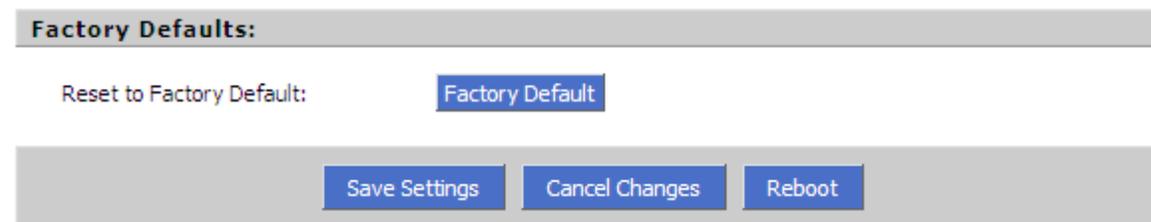

### In menu:

Press **Menu** button and choose **17factory Default**, then a notice will appear, press the **ok softkey button** to continue.

### Using Website:

Step 1. Access to website, open **Administration/Management** webpage;

Step 2. Press the **factory default** button at the bottom of the webpage;

Step 3. Waiting about 5 seconds, the red notice **Please REBOOT to make the changes effective!** will appear, and then press **Reboot** button to reboot IP652.

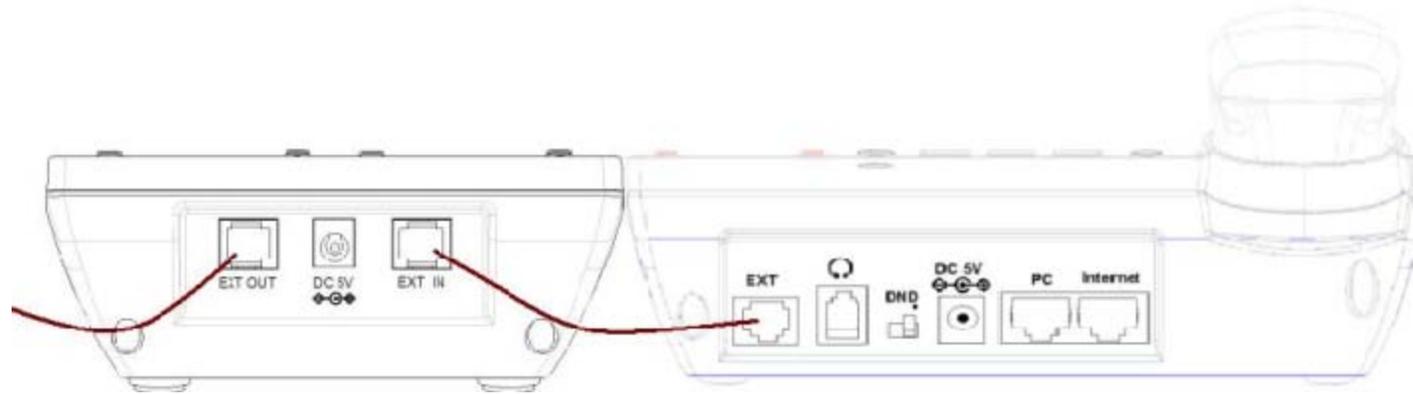

Note: If you choose factory default, you will return the phone to the original factory settings and will erase all current settings, including the directory and call logs.

## 7 EXP40

### 7.1 Correct Connections

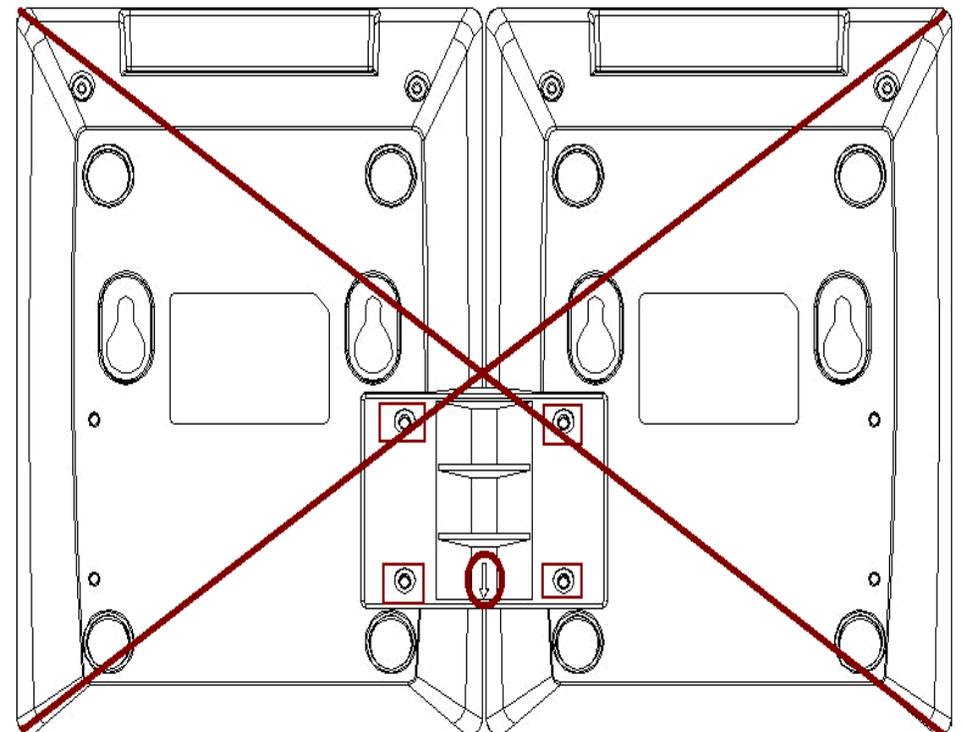

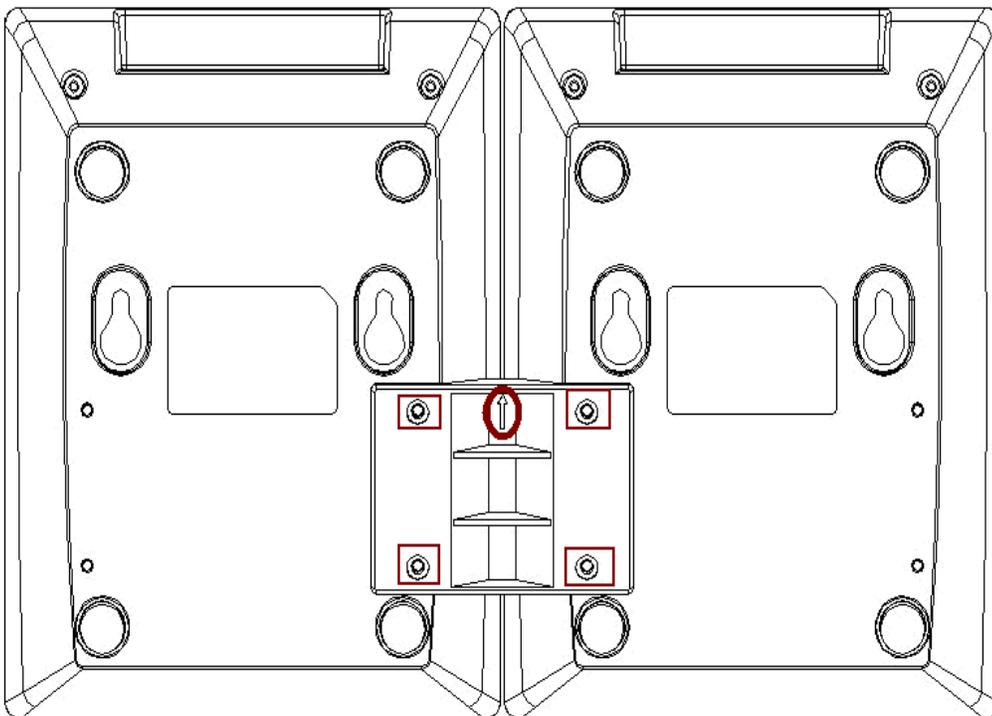

Connect the EXP40 to the IP652; please do like the following picture:

The **EXT IN** port is used to connect to the IP652; the **EXT out** port is used to connect to the next EXP40.

To fix the EXP40 and the IP652 or fix two EXP 40; please do like the following left picture, the right picture is wrong:

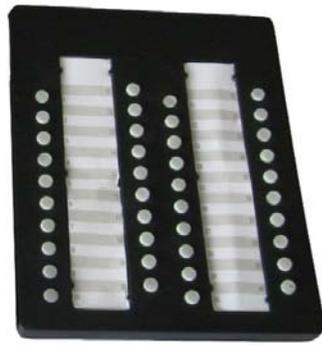

Note: the ↑ iron is used to indicator up.

## 7.2 Using EXP40

Below are two pictures: one is EXP40 and the other is IP652 with one EXP40. The IP652 can support 6 EXP40 at mostly.

The EXP40 is the device with 40 multi-functional key, every keys in the EXP40 can be configured as speed dial, BLF, shortcut key, call pickup, and Call Park. The usage of the five kinds (speed dial, BLF, shortcut key, call pickup, and Call Park) is same as the ones in IP652.

**EXP40**

**IP652 with one EXP40**

# 8 CONFIGURATION

## 8.1 Web-based Configuration

This section will show you how to configure your IP652 using the web-based configuration interface. The default network settings are as follow:

Default Internet Connection Type: **DHCP**

Default PC Port Connection Type: **NAT**

Default user name of admin mode: **admin**

Default password of admin mode: **admin**

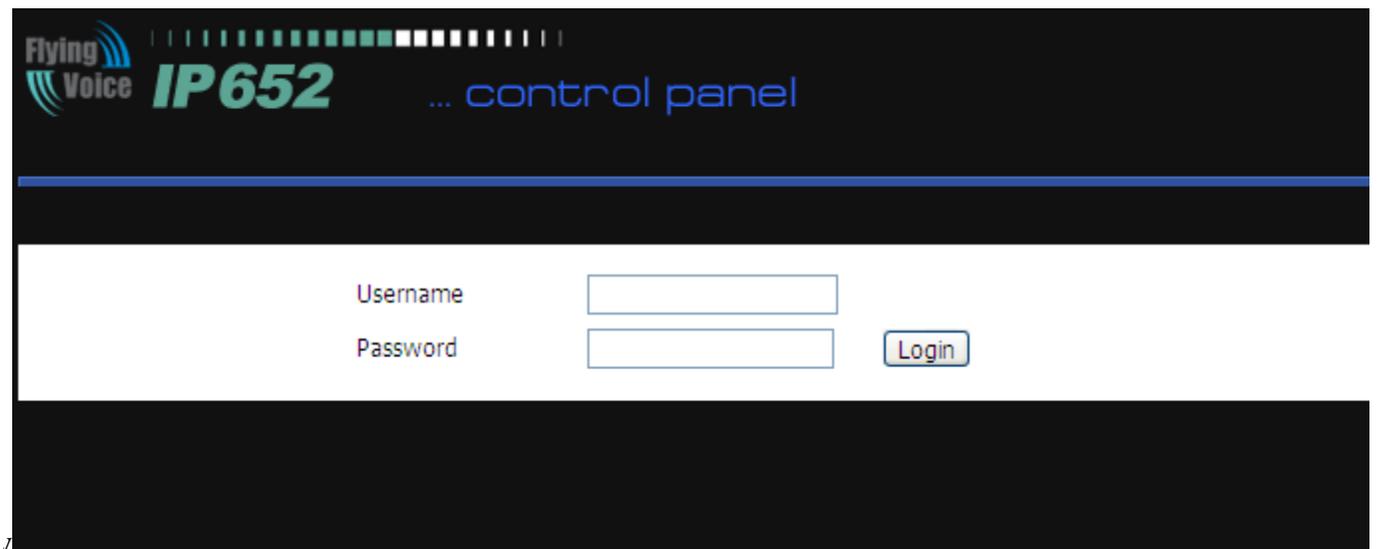

Default user name of user mode: **user**

Default password of user mode: **(null)**

Default Web login port: **80**

Web Idle Timeout: **5 min**

Local DHCP Server: Enable

## 8.2 Login

To access the webpage through a web browser, please following the below steps:

Step 1. Setup IP652 correctly

Step 2. Lookup the Internet IP Address in the left side of LCD

Step 3. Enter “**http://Internet IP Address:80**” in the address field of the browser.

Note: 80 should be added.

Step 4. Type “**admin**” or “**user**” for the User Name and corresponding password for Password, and click on the **Login** button to

access the configuration page

There are two levels of web configuration: one “user” ID level that can view just some portion in the web, and the other “admin” ID level that can view and configure all settings in the web-based configuration interface. To use “admin” ID for login, please contact your administrator, supplier or service provider.

## 8.3 Webpage

| No. | Name                | Description   |
|-----|---------------------|---|
| 1   | main information    | Display the firmware version, DSP version, Current Time, and administration mode. Press <b>Logout</b> button to logout. |
| 2   | navigation bar      | Click navigation bar, many sub-navigation bar will appear in the place 4.   |
| 3   | Help                | Display the main information for configuration; user can get help from it directly.                                     |
| 4   | sub-navigation bar  | Click sub-navigation bar to enter to configuration webpage  |
| 5   | configuration title | The configuration title   |
| 6   | configuration bars  | The configuration bars  |
|     |                     | ◆ Every time making some changes, user  |

|  |   |   |
|--|---|---|
|  |   | <p>should press the button to confirm and save the changes.</p> <p>◆ After pressing the button, the red <i>Please REBOOT to make the changes effective!</i> will appear to notice user to reboot.</p> |
|  |  | <p>To cancel the changes.</p>   |
|  |  | <p>Press it to reboot IP652</p>   |

## 8.4 Status

### 8.4.1 Basic

This webpage displays the basic status of your IP652, including the information about product information, SIP account status, network status, VPN status, PC port status and system status.

Click **Refresh** button to refresh the status.

The screenshot shows the IP652 control panel interface. At the top right, it displays: Firmware Version: 1.4.3 (Hy1228021326), DSP Version: D2.64, Current Time: Jan 01 12:03:59 AM 2000, and Admin Mode with a Logout link. The main navigation bar includes Status, SIP Account, Network, Phone, and Administration. Below this, there are tabs for Basic, DHCP, and Syslog. The content area is divided into several sections:

- Product Information:**

|                            |                      |
|----------------------------|----------------------|
| Product Name:              | IP652                |
| Internet(WAN) MAC Address: | 00:03:58:EC:46:F7    |
| PC(LAN) MAC Address:       | 00:03:58:EC:46:F6    |
| Hardware Version:          | 1.0.1                |
| Firmware Version:          | 1.4.3 (Hy1228021326) |
| DSP Version:               | D2.64                |
- Line Status:**

|                |         |
|----------------|---------|
| Line 1 Status: | Disable |
| Line 2 Status: | Disable |
| Line 3 Status: | Disable |
| Line 4 Status: | Disable |
| Line 5 Status: | Disable |
- Network Status:**

|                    |                |
|--------------------|----------------|
| Connection Status: | Connected      |
| Connection Type:   | DHCP           |
| IP Address:        | 192.168.10.200 |
| Subnet Mask:       | 255.255.255.0  |
| Default Gateway:   | 192.168.10.111 |
| Primary DNS:       | 192.168.10.111 |
| Secondary DNS:     | 0.0.0.0        |
- VPN Status:**

|                     |         |
|---------------------|---------|
| VPN Type:           | Disable |
| Virtual IP Address: | 0.0.0.0 |
- PC Port Status:**

|                    |               |
|--------------------|---------------|
| Connection Status: | Failed        |
| Connection Type:   | NAT           |
| IP Address:        | 192.168.1.1   |
| Subnet Mask:       | 255.255.255.0 |
- System Status:**

|               |                         |
|---------------|-------------------------|
| Current Time: | Jan 01 12:03:59 AM 2000 |
| Elapsed Time: | 0 D/0 H/4 M             |

A **Refresh** button is located at the bottom center of the page.

## 8.4.2 DHCP

IP652 can be used as DHCP server, this page displays the status about DHCP server enable/disable, start IP address, end IP address and client lease time.

Click **Refresh** button to refresh status of DHCP server.

| Dynamic Host Configuration Protocol |                 |
|-------------------------------------|-----------------|
| <b>DHCP Status</b>                  |                 |
| DHCP Server:                        | Disable         |
| Start IP Address:                   | 192.168.252.2   |
| End IP Address:                     | 192.168.252.254 |
| Client Lease Time:                  | 48 Hr.          |

[Refresh](#)

## 8.4.3 Syslog

This page displays the log of system.

User can press **Remove All** button to clear all information,

Click **Refresh** button to refresh syslog.

**Syslog**

```

#### 8.5.1.2 NAT Traversal

| Webpage | Field Name                 | Description   |
|---------|----------------------------|---|
|         | NAT Traversal              | If or not enable NAT. IP652 supports STUN traversal, choose “STUN” in the “NAT Traversal Mode” if you want traverse NAT/Firewall. |
|         | STUN Server Address        | STUN server IP address, default is stun.fwdnet.net  |
|         | NAT Refresh Interval (sec) | the interval to refresh   |
|         | STUN Server Port           | STUN Server Port  |

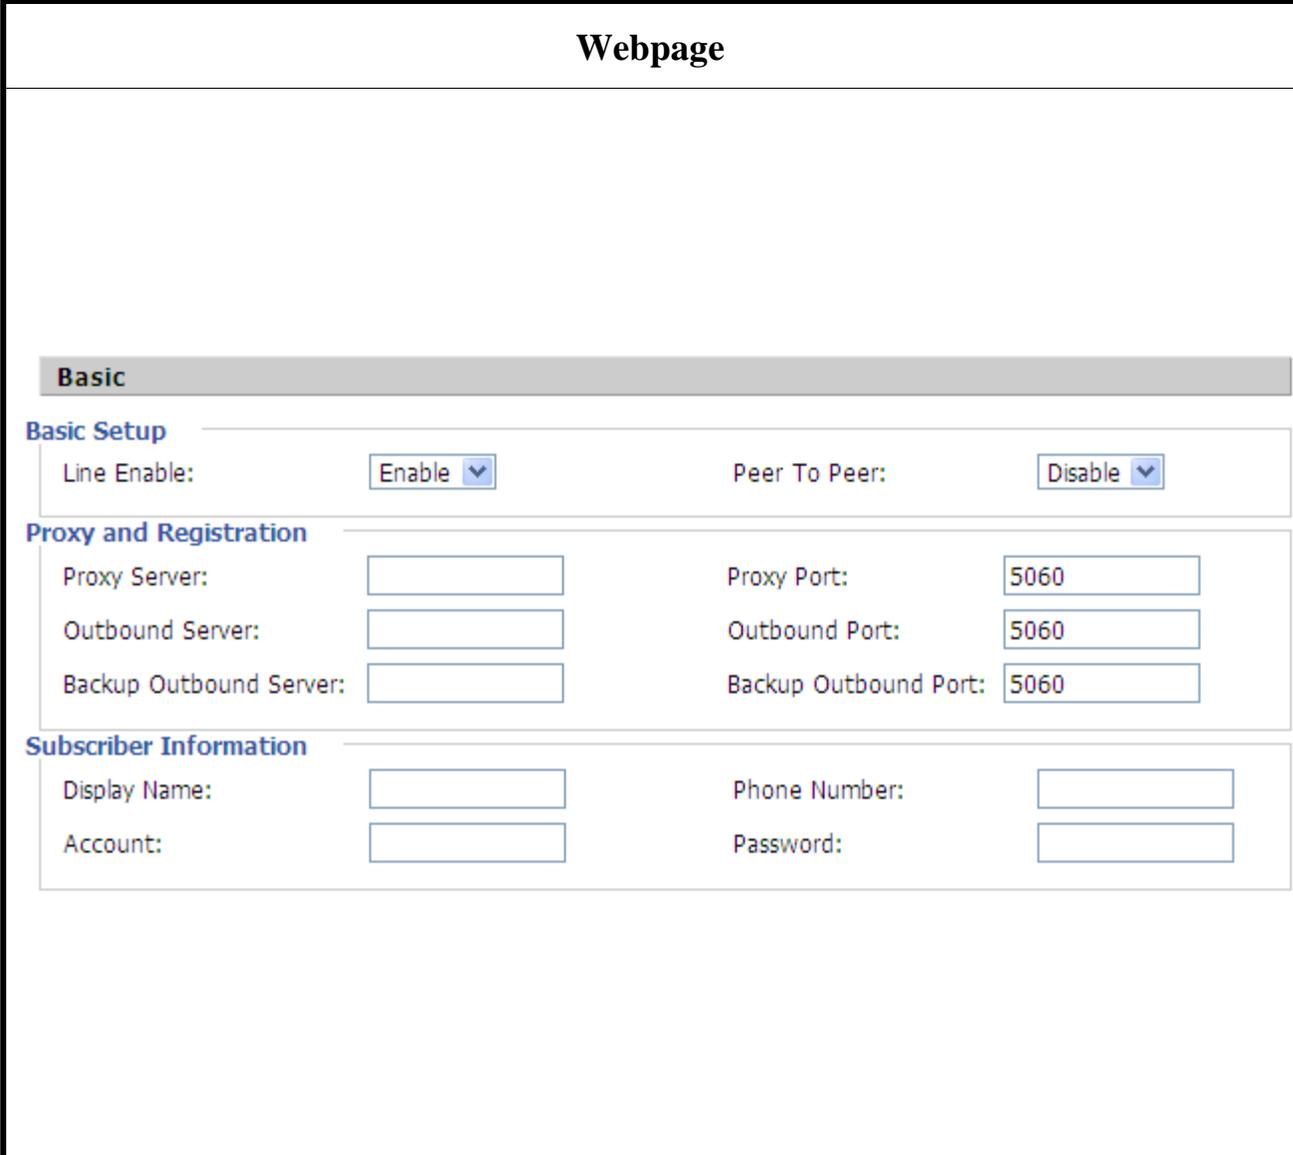

## 8.5.2 Line 1

In this webpage, users can configuration the information about SIP account1, including the following 4 parts: Basic, Audio Configuration, User and Advanced.

Following is the description about that.

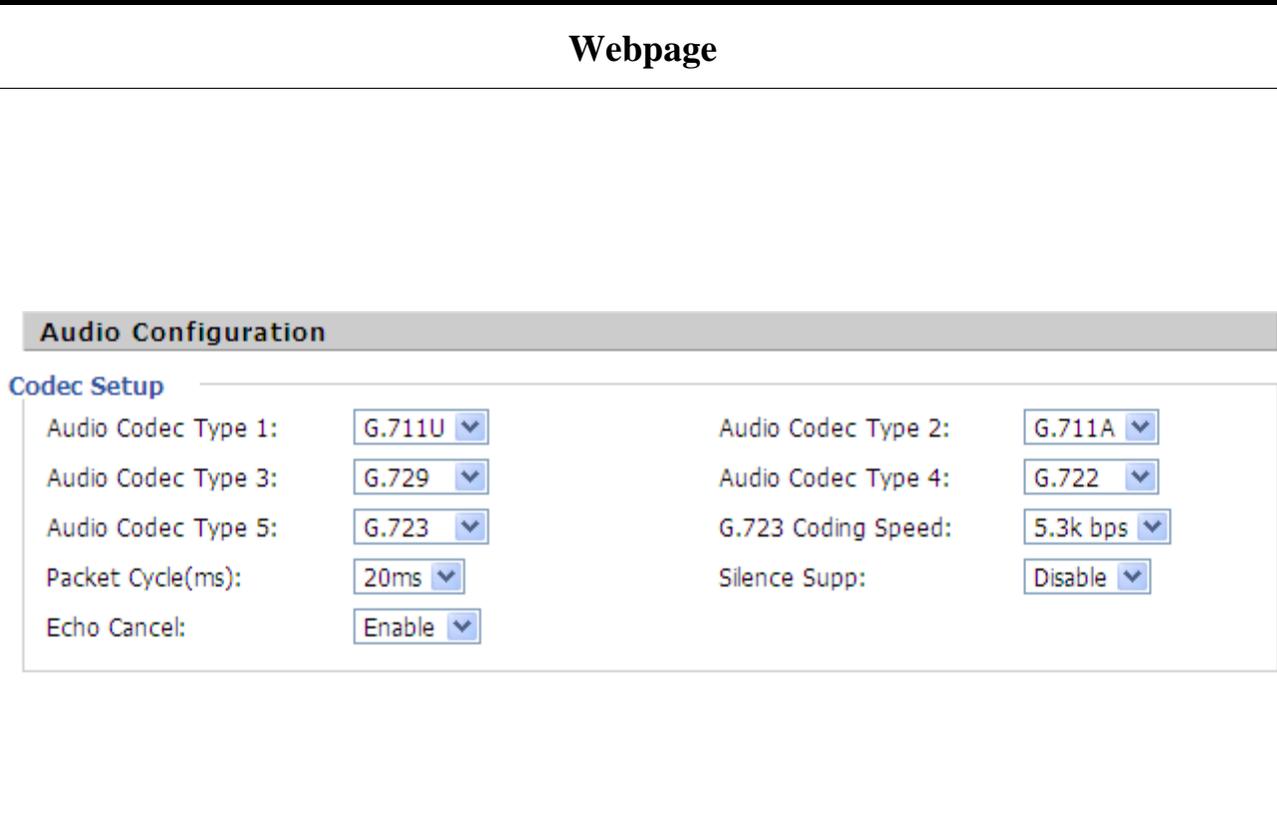

### 8.5.2.1 Basic

Set the basic information provided by your VOIP Service Provider, such as Phone Number, Account, password, SIP Proxy and so on.

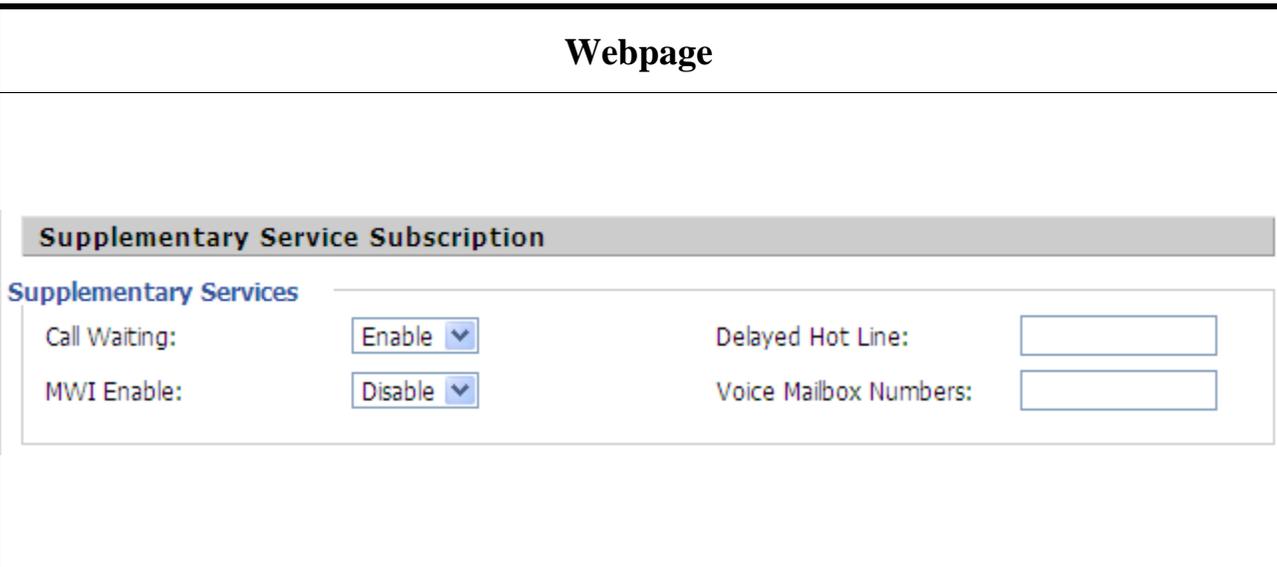

| Webpage  | Field Name             | Description   |
|--|------------------------|---|
|  <p>The screenshot shows a configuration page with three main sections: <b>Basic Setup</b> (Line Enable: Enable, Peer To Peer: Disable), <b>Proxy and Registration</b> (Proxy Server, Proxy Port: 5060, Outbound Server, Outbound Port: 5060, Backup Outbound Server, Backup Outbound Port: 5060), and <b>Subscriber Information</b> (Display Name, Account, Phone Number, Password).</p> | Line Enable            | If or not enable Line 1   |
|  | Peer to Peer           | If or not enable PEER to PEER<br>◆ If enable, SIP-1 will not send register request to SIP server;<br>◆ In System Status, SIP-1 Status is Registered;<br>◆ SIP-1 can make call out, but others can not call SIP-1. |
|  | Proxy Server           | The IP address of SIP Proxy Server  |
|  | Proxy Port             | The port which SIP Server supports for VOIP service, default is 5060  |
|  | Outbound Server        | Outbound Proxy IP or domain name  |
|  | Outbound Port          | Outbound Proxy's Service port   |
|  | Backup Outbound Server | Backup Outbound Server address or domain name   |
|  | Backup Outbound Port   | Port of Backup Outbound Server  |
|  | Display Name           | The number will display in callee   |
|  | Phone Number           | Number of telephone provided by SIP Proxy   |
|  | Account                | SIP account provided by SIP Proxy   |
|  | Password               | SIP password provided by SIP Proxy  |

## 8.5.2.2 Audio Configuration

Select the audio Codec you want to use.

| Webpage  | Field Name         | Description  |
|--|--------------------|--|
|  <p>The screenshot shows the 'Audio Configuration' section of a web interface. It includes a 'Codec Setup' area with dropdown menus for Audio Codec Type 1 (G.711U), Type 2 (G.711A), Type 3 (G.729), Type 4 (G.722), Type 5 (G.723), G.723 Coding Speed (5.3k bps), Packet Cycle (20ms), Silence Supp (Disable), and Echo Cancel (Enable).</p> | Audio Codec Type1  | Choose the audio codec type from G.711U, G.711A, G.722, G.729, G.723 |
|  | Audio Codec Type2  | Choose the audio codec type from G.711U, G.711A, G.722, G.729, G.723 |
|  | Audio Codec Type3  | Choose the audio codec type from G.711U, G.711A, G.722, G.729, G.723 |
|  | Audio Codec Type4  | Choose the audio codec type from G.711U, G.711A, G.722, G.729, G.723 |
|  | Audio Codec Type5  | Choose the audio codec type from G.711U, G.711A, G.722, G.729, G.723 |
|  | G.723 Coding Speed | Choose the speed of G.723 from 5.3kbps and 6.3kbps                   |
|  | Packet Cycle       | The RTP packet cycle time  |
|  | Silence Supp       | If or not enable silence   |
|  | Echo Cancel        | If or not enable echo cancel   |

## 8.5.2.3 Supplementary Services Subscription

| Webpage   | Field Name            | Description  |
|---|-----------------------|--|
|  <p>The screenshot shows the 'Supplementary Service Subscription' section of a web interface. It includes a 'Supplementary Services' area with dropdown menus for Call Waiting (Enable) and MWI Enable (Disable), and text input fields for Delayed Hot Line and Voice Mailbox Numbers.</p> | Call Waiting          | If or not enable Call waiting.   |
|   | Delayed Hot Line      | Fill in the hotline number.<br>Pickup handset or press speaker/headset button, IP652 will dial out the hotline number automatically. |
|   | MWI Enable            | If or not enable MWI (message waiting indicate).   |
|   | Voice Mailbox Numbers | Fill in the voice mailbox phone number   |

### 8.5.2.4 Advanced

| Webpage  | Field Name  | Description   |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
|--|---|---|--|---|---|---|--|---|---|---|--|---|--|--|--|---|--|---|------------------|--|
| <div style="border: 1px solid black; padding: 10px;"> <p style="text-align: center; background-color: #cccccc; margin: -10px -10px 10px -10px;"><b>Advanced</b></p> <p><b>Advanced Setup</b></p> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%;">Domain Name Type: <input type="text" value="Enable"/></td> <td style="width: 50%;">Carry Port Information: <input type="text" value="Disable"/></td> </tr> <tr> <td>Signal Port: <input type="text" value="5060"/></td> <td>DTMF Type: <input type="text" value="RFC2833"/></td> </tr> <tr> <td>RFC2833 Payload(&gt;=96): <input type="text" value="101"/></td> <td>Register Refresh Interval(sec): <input type="text" value="3600"/></td> </tr> <tr> <td>RTP Port: <input type="text" value="0"/> (= 0 auto select)</td> <td>Cancel Message Enable: <input type="text" value="Disable"/></td> </tr> <tr> <td>Session Refresh Time(sec): <input type="text" value="180"/></td> <td>Refresher: <input type="text" value="UAC"/></td> </tr> <tr> <td>Prack Enable: <input type="text" value="Disable"/></td> <td>SIP Ping Enable: <input type="text" value="Disable"/></td> </tr> <tr> <td>Keep-alive Interval(10-60s): <input type="text" value="15"/></td> <td>Anonymous Call: <input type="text" value="Disable"/></td> </tr> <tr> <td>Anonymous Call Block: <input type="text" value="Disable"/></td> <td>Proxy DNS Type: <input type="text" value="A Type"/></td> </tr> <tr> <td>Use OB Proxy In Dialog: <input type="text" value="Disable"/></td> <td>VPN: <input type="text" value="Disable"/></td> </tr> </table> </div> | Domain Name Type: <input type="text" value="Enable"/>   | Carry Port Information: <input type="text" value="Disable"/>      | Signal Port: <input type="text" value="5060"/> | DTMF Type: <input type="text" value="RFC2833"/> | RFC2833 Payload(>=96): <input type="text" value="101"/> | Register Refresh Interval(sec): <input type="text" value="3600"/> | RTP Port: <input type="text" value="0"/> (= 0 auto select) | Cancel Message Enable: <input type="text" value="Disable"/> | Session Refresh Time(sec): <input type="text" value="180"/> | Refresher: <input type="text" value="UAC"/> | Prack Enable: <input type="text" value="Disable"/> | SIP Ping Enable: <input type="text" value="Disable"/> | Keep-alive Interval(10-60s): <input type="text" value="15"/> | Anonymous Call: <input type="text" value="Disable"/> | Anonymous Call Block: <input type="text" value="Disable"/> | Proxy DNS Type: <input type="text" value="A Type"/> | Use OB Proxy In Dialog: <input type="text" value="Disable"/> | VPN: <input type="text" value="Disable"/> | Domain name Type | If or not use domain name in the SIP URI |
|  | Domain Name Type: <input type="text" value="Enable"/>   | Carry Port Information: <input type="text" value="Disable"/>      |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
|  | Signal Port: <input type="text" value="5060"/>  | DTMF Type: <input type="text" value="RFC2833"/>                   |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
|  | RFC2833 Payload(>=96): <input type="text" value="101"/>   | Register Refresh Interval(sec): <input type="text" value="3600"/> |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
|  | RTP Port: <input type="text" value="0"/> (= 0 auto select)  | Cancel Message Enable: <input type="text" value="Disable"/>       |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
|  | Session Refresh Time(sec): <input type="text" value="180"/>   | Refresher: <input type="text" value="UAC"/>                       |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
|  | Prack Enable: <input type="text" value="Disable"/>  | SIP Ping Enable: <input type="text" value="Disable"/>             |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
|  | Keep-alive Interval(10-60s): <input type="text" value="15"/>  | Anonymous Call: <input type="text" value="Disable"/>              |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
|  | Anonymous Call Block: <input type="text" value="Disable"/>  | Proxy DNS Type: <input type="text" value="A Type"/>               |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
|  | Use OB Proxy In Dialog: <input type="text" value="Disable"/>  | VPN: <input type="text" value="Disable"/>                         |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
|  | Carry Port Information  | If or not carry Port information in the SIP URI.                  |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
|  | Signal Port   | The local port of SIP protocol, default is 5060                   |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
|  | DTMF Type   | Choose the DTMF type from IN_band, RFC2833 and SIP INFO.          |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
|  | RFC2833 Payload (>=96)  | User can use the default setting                                  |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
| Register Refresh Interval  | The interval between two normal Register messages. You can use the default setting.   |   |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
| RTP Port   | Set the port to send RTP.<br>IP Phone will select one idle port for RTP if you set "0", otherwise use the value user set.   |   |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
| Cancel Message Enable  | When you set enable, an unregistered message will be sent before registration, while you set disable, unregistered message will not be sent before registration. You should set the option for different Proxy. |   |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
| Prack Enable   | If or not enable prack.   |   |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
| SIP Ping Enable  | If this option enable, IP Phone will send SIP-PING to Server periodically instead of sending hello packet. The send interval is Keep-alive interval.  |   |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
| Keep-alive interval (10-60s)   | The interval that IP Phone will send an empty packet to Proxy.  |   |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
| Anonymous Call   | If or not allow make the dialed call anonymous to other   |   |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |
| Anonymous  | If or not forbid anonymous call from others   |   |  |   |   |   |  |   |   |   |  |   |  |  |  |   |  |   |                  |  |

|  |                        |                                  |
|--|------------------------|----------------------------------|
|  | Call Block             |                                  |
|  | Proxy DNS Type         | Choose Proxy DNS type            |
|  | Use OB Proxy in dialog | If or not use OB Proxy in dialog |
|  | VPN                    | If or not use VPN                |

### 8.5.3 Line 2/3/4/5

The parameters of Line2/3/4/5 are same as Line1 except the value of **Line Enable**.

## 8.6 Network

### 8.6.1 Basic

User can configuration the parameters of Internet Port, PC port and Network Address Server Settings (DHCP). The details are as follows:

#### 8.6.1.1 Internet Port (WAN)

##### Static:

In static mode, user should fill in the values of IP Address, Subnet Mask, Default Gateway, Primary DNS and Second DNS got from your administration.

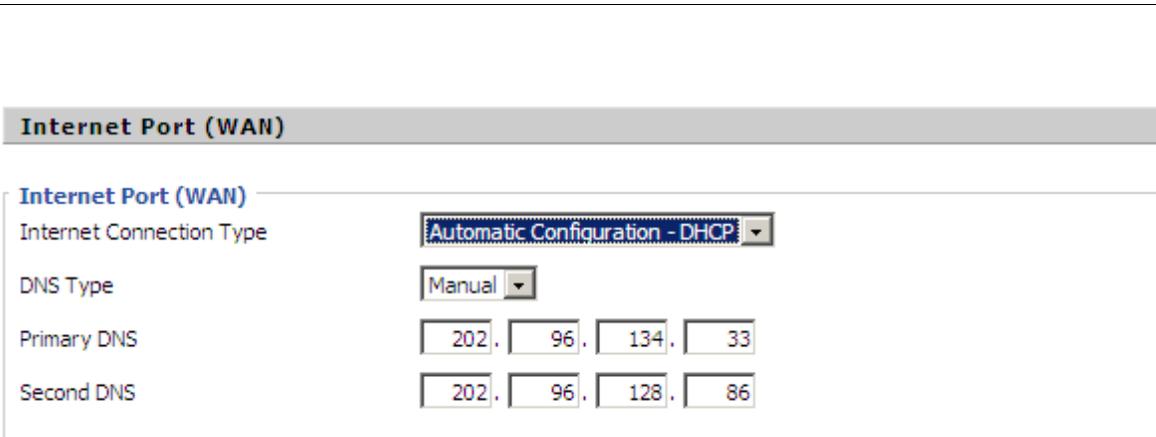

| Webpage | Field Name               | Description                           |
|---------|--------------------------|---------------------------------------|
|         | Internet Connection Type | Choose Static IP.                     |
|         | IP Address               | The IP address of Internet port       |
|         | Subnet Mask              | The subnet mask of Internet port.     |
|         | Default                  | The default gateway of Internet port. |

|  |             |                                   |
|--|-------------|-----------------------------------|
|  | Gateway     |                                   |
|  | Primary DNS | The primary DNS of Internet port. |
|  | Second DNS  | The second DNS of Internet port.  |

## DHCP:

In DHCP mode, IP phone is a DHCP client.

IP phone will get the IP Address, Subnet Mask and Default Gateway from the DHCP server.

| Webpage   | Field Name               | Description  |
|---|--------------------------|--|
|  | Internet Connection Type | Choose Automatic Configuration-DHCP.   |
|   | DNS type                 | Choose DNS type from Manual and Automatic<br>◆ In Manual: user should set the Primary DNS and Second DNS manually.<br>◆ In Automatic: IP Phone will get the Primary DNS and Second DNS from DHCP Server automatically. |

## PPPoE:

| Webpage | Field Name               | Description   |
|---------|--------------------------|---|
|         | Internet Connection Type | Choose PPPoE.   |
|         | PPPoE Account            | Fill in the PPPoE account which get from Internet Service Provider                        |
|         | PPPoE Password           | Fill in the PPPoE account get from Internet Service Provider                              |
|         | PPPoE Auto-Dial          | If or not enable PPPoE Auto-Dial.   |
|         | DNS Type                 | Choose DNS type from Manual and Automatic<br>◆ In Manual: user should set the Primary DNS |

| Internet Port (WAN)  |  |   |
|--|--|---|
| <p><b>Internet Port (WAN)</b></p> <p>Internet Connection Type: <input type="text" value="PPPoE"/></p> <p>PPPoE Account: <input type="text"/></p> <p>PPPoE Password: <input type="text"/></p> <p>MTU: <input type="text" value="1500"/></p> <p>MRU: <input type="text" value="1500"/></p> <p>PPPoE Auto Dial: <input type="text" value="Enable"/></p> <p>DNS Type: <input type="text" value="Manual"/></p> <p>Primary DNS: <input type="text" value="202."/><input type="text" value="96."/><input type="text" value="134."/><input type="text" value="33"/></p> <p>Second DNS: <input type="text" value="202."/><input type="text" value="96."/><input type="text" value="128."/><input type="text" value="86"/></p> |  | <p>and Second DNS manually.</p> <p>◆ In Automatic: IP Phone will get the Primary DNS and Second DNS from DHCP Server automatically.</p> |
| Primary DNS  |  | The primary DNS of Internet port.   |
| Second DNS   |  | The second DNS of Internet port.  |

### 8.6.1.2 PC Port (LAN)

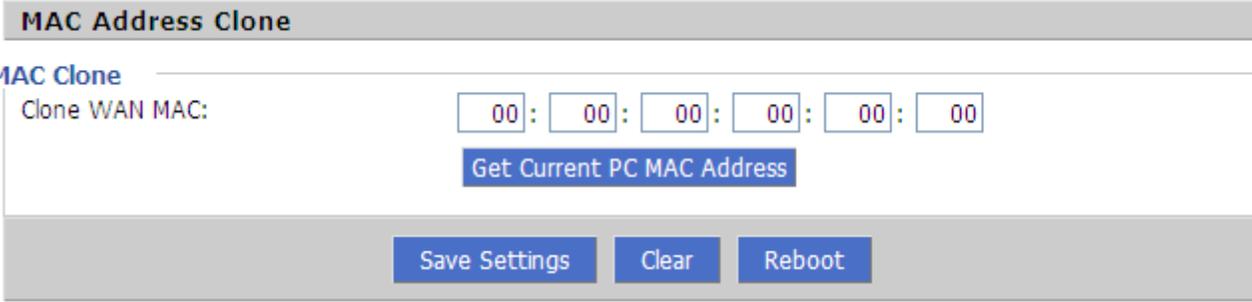

| Webpage   |  | Field Name              | Description  |
|---|--|-------------------------|--|
| <p><b>PC Port(LAN)</b></p> <p>PC Port Connection Type: <input type="text" value="NAT"/></p> <p>Local IP Address: <input type="text" value="192."/><input type="text" value="168."/><input type="text" value="252."/><input type="text" value="1"/></p> <p>Subnet Mask: <input type="text" value="255.255.255.0"/></p> |  | PC Port Connection Type | Choose the PC port connection type from disable, NAT and Bridge. |
|   |  | Local IP Address        | Set the IP address of PC port. Efficient when user choose NAT.   |
|   |  | Subnet Mask             | Set the subnet mask of PC port. Efficient when user choose NAT.  |

### 8.6.1.3 Network Address Server Settings (DHCP)

| Webpage  |  | Field Name        | Description  |
|--|--|-------------------|--|
| <p><b>Network Address Server Settings (DHCP)</b></p> <p>Local DHCP Server: <input type="text" value="Enable"/></p> <p>Start IP Address: <input type="text" value="192."/><input type="text" value="168."/><input type="text" value="252."/><input type="text" value="2"/></p> <p>Number of Address: <input type="text" value="253"/></p> <p>Client Lease Time: <input type="text" value="48"/> Hr(0 means one day).</p> <p>Primary DNS: <input type="text" value="219."/><input type="text" value="141."/><input type="text" value="136."/><input type="text" value="10"/></p> <p>Second DNS: <input type="text" value="219."/><input type="text" value="141."/><input type="text" value="140."/><input type="text" value="10"/></p> |  | Local DHCP Server | If or not enable DHCP Server.<br>If PC port is not in NAT mode, user can not enable DHCP server.   |
|  |  | Start IP Address  | The starting IP address which IP phone will attribute to clients.<br>Note: The Network Sect of DHCP Server Start Address should be the same with the one that IP652's PC port.<br>Generally speaking, you can use the default setting. |
|  |  | Number of         | Number of IP address will distribute to clients.   |

|  |                   |   |
|--|-------------------|---|
|  | Address           |   |
|  | Client Lease Time | The interval of DHCP will send request to continue in period of validity. Unit is hour. |
|  | Primary DNS       | Primary DNS that DHCP Server will distribute.<br>You can use the default setting.       |
|  | Secondary DNS     | Secondary DNS that DHCP Server will distribute.<br>You can use the default setting.     |

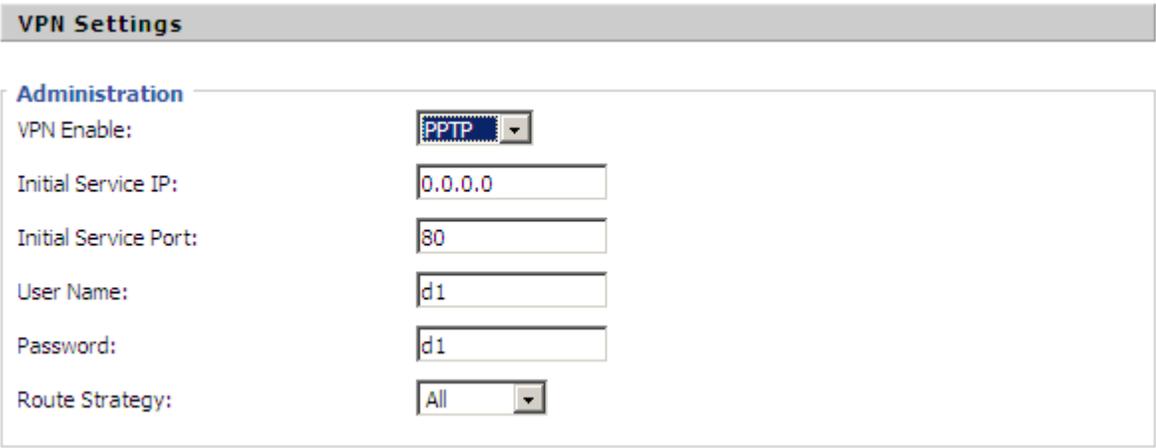

## 8.6.2 MAC Address Clone

| Webpage  | Description  |
|--|--|
|  | <p>MAC is the hardware address of network equipment. Sometimes, network providers may bind network account with the network equipment's MAC address. So you may not pass the provider's authentication when you use a new IP652. In this case, you can use MAC Clone to copy your PC's MAC address to IP652's Internet port.</p> <p>MAC is an important parameter for network equipments, so you should make sure that the MAC is right, in order to prevent to make IP652 unusable.</p> <p>You can login IP652's Web via PC port if you are incautious to make it wrong. And then cloning the right MAC or resume the default settings.</p> <p>Step 1 Press <b>Get Current PC MAC Address</b> button to get the PC's MAC address</p> <p>Step 2 Press <b>Save Settings</b> to save the changes</p> <p>Step 3. Press <b>Clear</b> to cancel MAC address clone.</p> <p>Step 4. Press Reboot to reboot IP652.</p> |

## 8.6.3 VPN

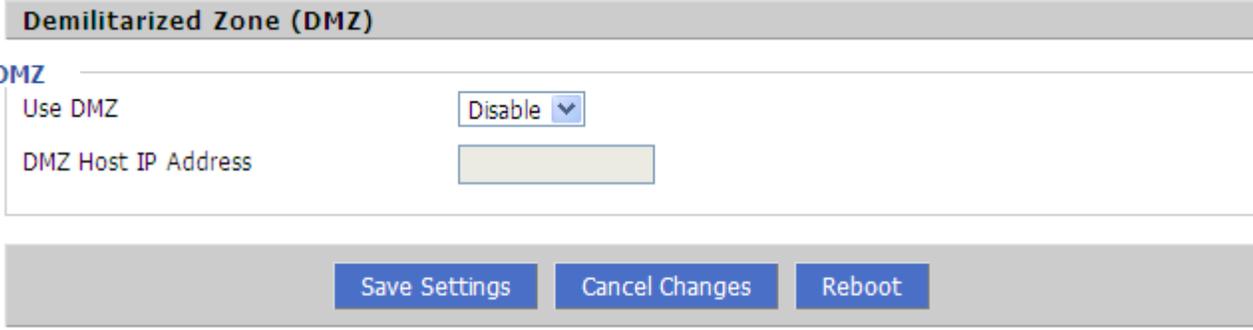

A Virtual Private Network (VPN) is the extension of a private network that encompasses links across shared or public networks like the Internet.

In short, by VPN technology, you can send data between two computers across a shared or public network in a manner that emulates the properties of a point-to-point private link.

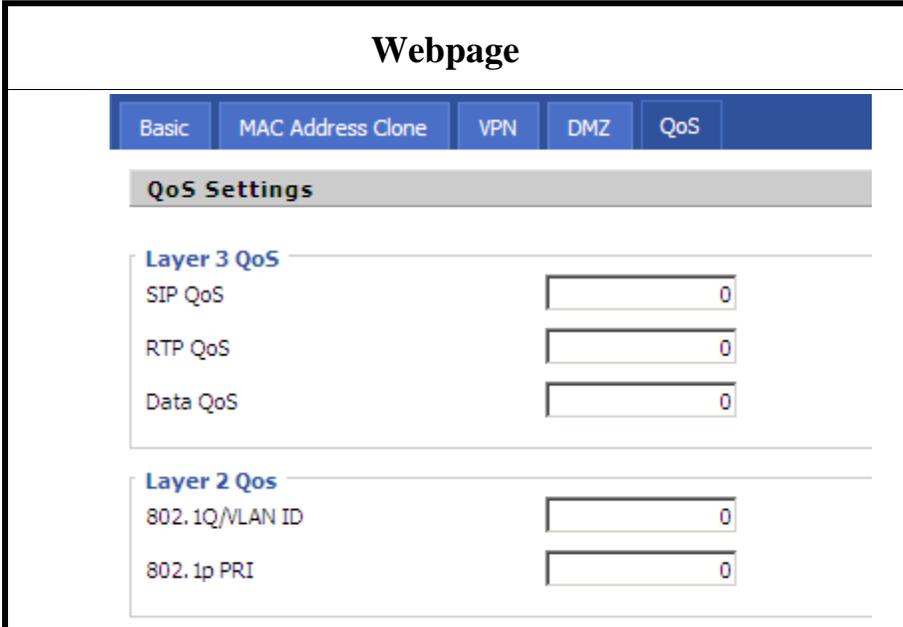

| Webpage  | Field Name           | Description   |
|--|----------------------|---|
|  | VPN Enable           | If or not enable VPN.<br>And user can choose the VPN mode from PPTP and L2TP. |
|  | Initial Service IP   | VPN server IP address   |
|  | Initial Service Port | VPN server port   |
|  | User Name            | The user name for authentication  |
|  | Password             | Password for authentication   |
|  | Route Strategy       | Choose route mode from all or SIP   |

## 8.6.4 DMZ

IP652 provides a facility DMZ Host that maps ALL unsolicited data on any protocol to a single host in the LAN. Regular web surfing and other such Internet activities from other clients will continue to work without inappropriate interruption. DMZ Host allows a defined internal user to be totally exposed to the Internet, which usually helps some special applications such as Netmeeting or Internet Games etc.

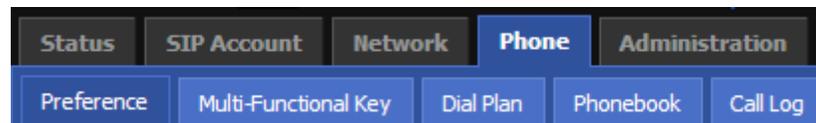

| Webpage  | Field Name          | Description                    |
|--|---------------------|--------------------------------|
|  | Use DMZ             | If or not enable DMZ           |
|  | DMZ Host IP Address | set the IP address of DMZ host |

## 8.6.5 QoS

| Webpage  | Description  |
|--|--|
|  | <p>Some ISP supply QoS services. The QoS services can make the best of improving the quality of Voice application. You can get the settings from the ISP if they supply QoS services. Please connect with them if you need it.</p> |

## 8.7 Phone

User can configuration volume, call forward, multi-functional key, dial plan, phonebook and call log.

### 8.7.1 Preference

User can configuration the value of ring volume, speakerphone volume, handset volume and so on.

#### 8.7.1.1 Preference

| Webpage | Field Name          | Description                            |
|---------|---------------------|--|
|         | Handset Input Gain  | Adjust the handset input gain from 0-7 |
|         | Handset Volume Gain | Adjust the output gain from 0-7        |

| Preference   |  | Field Name              | Description                                 |
|--|--|-------------------------|---|
| <b>Volume Settings</b><br>Handset Input Gain: <input type="text" value="5"/> Speakerphone Input Gain: <input type="text" value="5"/><br>Handset Volume: <input type="text" value="5"/> Speaker Volume: <input type="text" value="5"/><br>Ringer Volume: <input type="text" value="5"/> |  | Speakerphone Input Gain | Adjust the speakerphone input gain from 0-7 |
|  |  | Speaker Volume          | Adjust the speaker volume form 0-7          |
|  |  | Ringer Volume           | Adjust the ringer volume form 0-7.          |

### 8.7.1.2 Regional

| Webpage  | Field Name            | Description  |
|--|-----------------------|--|

|  | Ringing Time(Sec)     | How long IP652 will ring   |

### 8.7.1.3 Call Forward

| Webpage | Field Name    | Description  |
|---------|---------------|--|
|         | Cfwd All Dest | The phone number which will be forwarded to.<br>IP Phone will forward all calls to the |

|   |                   |   |
|---|-------------------|---|
| <p><b>Call Forward</b></p> <p>Cfwd All Dest: <input type="text"/> Cfwd Busy Dest: <input type="text"/></p> <p>Cfwd No Ans Dest: <input type="text"/> Cfwd No Ans Delay: <input type="text" value="20"/></p> |                   | phone number immediately when there is an incoming call.                          |
|   | Cfwd Busy Dest    | The phone number which will be forwarded to when line is busy.                    |
|   | Cfwd No Ans Dest  | The phone number which will be forwarded to when there's no answer at your phone. |
|   | Cfwd No Ans Delay | The seconds to delay forwarding calls, if there is no answer at your phone.       |

### 8.7.1.4 Miscellaneous

| Webpage   | Field Name              | Description  |
|---|-------------------------|--|
| <p><b>Miscellaneous</b></p> <p>Auto Answer: <input type="text" value="Disable"/> Auto Answer by CallINFO: <input type="text" value="Disable"/></p> <p>Dial Time Out: <input type="text" value="5"/> Call Immediately Key: <input type="text" value="#"/></p> <p>ICMP Ping: <input type="text" value="Disable"/> Preferred Audio Device: <input type="text" value="Handsfree"/></p> <p>Auto Hookon Mode: <input type="text" value="Enable"/></p> | Auto Answer             | If or not enable auto answer. If enable, IP622 will auto answer all incoming call immediately.   |
|   | Auto Answer by CallINFO | If or not enable auto answer mode by judging CallINFO.   |
|   | Dial Time Out           | How long IP622 to sound dial out tone when IP622 dialing number.   |
|   | Call Immediately Key    | Choose call immediately key form * or #.   |
|   | ICMP Ping               | If or not enable ICMP Ping. If enable this option, IP622 will ping the SIP Server every interval time, otherwise, It will send "hello" empty packet to the SIP Server. |
|   | Preferred Audio Device  | Choose Handfree key mode or Headset Mode   |
|   | Auto Hookon Mode        | If or not enable auto hookon mode. If the audio device is not handset, then hook up phone automatically.   |

## 8.7.2 Multi-Functional Key

Step 1. Choose one **current key board** to configuration from Basic Board, Expansion Board 1, Expansion Board 2, Expansion Board 3, Expansion Board 4, Expansion Board 5 and Expansion Board 6.

Step 2. Choose one **Exp Key** from Exp Key 1 to Exp Key 20.

Step 3. Choose one **function type** from **speed dial**, **BLF**, **shortcut key**, **call pickup** and **call park**.

Step 4. Set the other corresponding parameters.

Step 5. Press **Save Settings** button to save changes, press **Cancel Changes** button to cancel changes.

**Below is an example:**

| Key       | Type       | Mode      | Line  | Expansion | Pickup Code |
|-----------|------------|-----------|-------|-----------|-------------|
| Exp Key1  | BLF        | Phonebook | Line1 | 5002      | 5002        |
| Exp Key2  | Speed Dial | Phonebook | Line1 | 5002      |             |
| Exp Key3  | BLF        | Phonebook | Line1 | 222       |             |
| Exp Key4  | Speed Dial | Phonebook | Line2 | 222       |             |
| Exp Key5  | Disable    | Phonebook | Line1 |           |             |
| Exp Key6  | Disable    | Phonebook | Line1 |           |             |
| Exp Key7  | Disable    | Phonebook | Line1 |           |             |
| Exp Key8  | Disable    | Phonebook | Line1 |           |             |
| Exp Key9  | Disable    | Phonebook | Line1 |           |             |
| Exp Key10 | Disable    | Phonebook | Line1 |           |             |
| Exp Key11 | Disable    | Phonebook | Line1 |           |             |
| Exp Key12 | Disable    | Phonebook | Line1 |           |             |
| Exp Key13 | Disable    | Phonebook | Line1 |           |             |
| Exp Key14 | Disable    | Phonebook | Line1 |           |             |
| Exp Key15 | Disable    | Phonebook | Line1 |           |             |
| Exp Key16 | Disable    | Phonebook | Line1 |           |             |
| Exp Key17 | Disable    | Phonebook | Line1 |           |             |
| Exp Key18 | Disable    | Phonebook | Line1 |           |             |
| Exp Key19 | Disable    | Phonebook | Line1 |           |             |
| Exp Key20 | Disable    | Phonebook | Line1 |           |             |

Please REBOOT to make the changes effective!

Save Settings

Cancel Changes

Reboot

### Adding speed dial:

- 1) Choose one Exp Key to configuration
- 2) Select the speed dial from the drop down list
- 3) Choose the Line from auto (the first line registered), line1, line2, line3, line 4 and line 5
- 4) Fill the phone number in Expansion
- 5) Press **Save Settings** to save changes and you can see the status of corresponding LED is solid green.
- 6) Press **Reboot** button to make changes effective.

If set properly, press the corresponding key to make call immediately, and the status of LED is solid red.

### Adding BLF:

- 1) Choose one Exp Key to configuration
- 2) Select the BLF from the drop down list
- 3) Choose the Line from line1, line2, line3, line 4 and line 5.
- 4) Fill the monitored phone number in Expansion
- 5) Fill the pickup code in **Pickup Code** if user wants to pickup the call when there is a new call coming in monitored phone.
- 6) Press **Save Settings** to save changes and you can see the status of corresponding LED is solid green.

7) Press **Reboot** button to make changes effective.

**Adding shortcut key:**

- 1) Choose one Exp Key to configuration
- 2) Select the shortcut key from the drop down list
- 3) Select the mode from the phonebook, call history, text message, volume+, volume- and login/logout in the drop down list.
- 4) Press **Save Settings** to save changes and you can see the status of corresponding LED is solid green.
- 5) Press **Reboot** button to make changes effective.

If set properly, press the corresponding button to access to phonebook, call history, text message, volume+, volume- and login/logout menu directly.

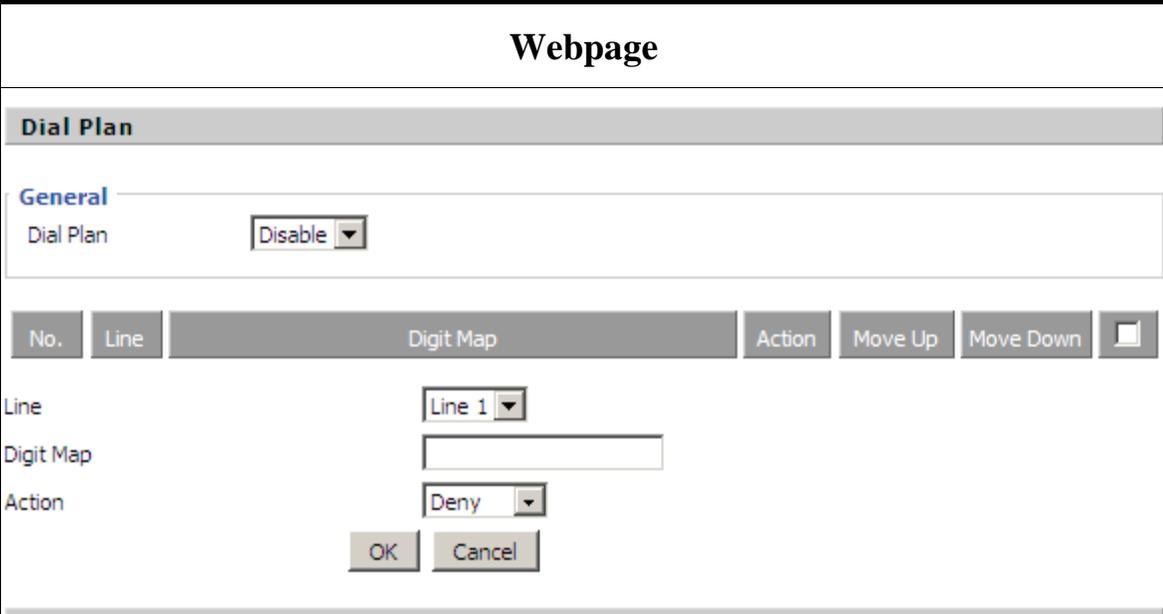

**Adding Call Pickup:**

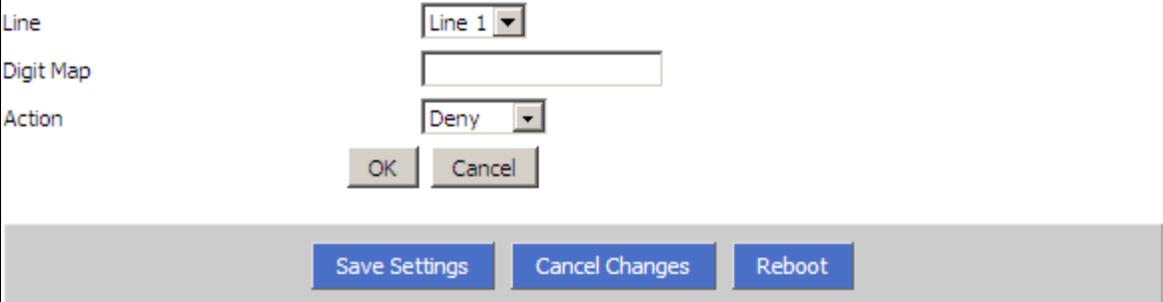

- 1) Choose one Exp Key to configuration
- 2) Select the call pickup from the drop down list
- 3) Choose the Line from line1, line2, line3, line4 and line5.
- 4) Fill the phone number in Expansion
- 5) Press **Save Settings** to save changes and you can see the status of corresponding LED is solid green.
- 6) Press **Reboot** button to make changes effective.

|--|---|

### 8.7.3.2 Dial Plan Syntactic

| No. | String                     | Description   |
|-----|----------------------------|---|
| 1   | 0 1 2 3 4 5 6 7 8 9<br>* # | Legal characters  |
| 2   | X                          | Lowercase letter x stands for one legal character   |
| 3   | [sequence]                 | To match one character form sequence.<br>For example:<br><ul style="list-style-type: none"> <li>[0-9]: match one digit form 0 to 9</li> <li>[23-5*]: match one character from 2 or 3 or 4 or 5 or *</li> </ul>  |
| 4   | x.                         | Match to $x^0, x^1, x^2, x^3, \dots, x^n$<br>For example:<br>"01.": can match "0", "01", "011", "0111", ....., "01111..."   |
| 5   | <dialed:<br>substituted>   | Replace dialed with substituted.<br>For example:<br><8:1650>123456: input is "85551212", output is"16505551212"   |
| 6   | x,y                        | Make outside dial tone after dialing "x", stop until dialing character "y"<br>For example:<br>"9,1xxxxxxxxx":IP652 make outside dial tone after inputting "9", stop tone until inputting "1"<br>"9,8,010x": make outside dial tone after inputting "9", stop tone until inputting "0" |

|   |   |  |
|---|---|--|
| 7 | T | <p>Set the delayed time.</p> <p>For example:</p> <p>“&lt;9:111&gt;T2”: IP652 will dial out the matched number “111” after 2 seconds.</p> |
|---|---|--|

### 8.7.3.3 Example

| No. | Line  | Digit Map            | Action   | Move Up | Move Down |                          |
|-----|-------|----------------------|----------|---------|-----------|--------------------------|
| 1   | Line1 | <:010>#12<#: %23>2   | Dial Out | ▲       | ▼         | <input type="checkbox"/> |
| 2   | Line2 | <5,;:><:241333>8101  | Dial Out | ▲       | ▼         | <input type="checkbox"/> |
| 3   | Line3 | <[4-5]:>22xxxx<:333> | Dial Out | ▲       | ▼         | <input type="checkbox"/> |
| 4   | Line4 | <2-3,;5:>622.        | Dial Out | ▲       | ▼         | <input type="checkbox"/> |
| 5   | Line5 | 777x.8               | Deny     | ▲       | ▼         | <input type="checkbox"/> |

**Example 1** points to Line 1.

**Example 2** points to Line 2.

**Example 3** points to Line 3.

**Example 4** points to Line 4.

**Example 5** points to Line 5.

- 1. Example 1**  
If user dials #12#2, G801 will call 010#12%232 immediately.
- 2. Example 2**  
If user dials 5,8101, G801 will call 2413338101 immediately, And G801 will make outside dial tone after inputting “5”, stop tone until inputting “8”.
- 3. Example 3**  
If user dials 422xxxx or 522xxxx, G801 will call 22xxxx333 immediately.
- 4. Example 4**  
If user dials 2,622 or 2,6222 or 2,62222, G801 will call 5622 or 56222 or 562222 immediately.  
And G801 will make outside dial tone after inputting “2” or “3”, stop tone until inputting “6”.
- 5. Example 5**

If user dials **777xx...x8**, G801 will reject the phone number out.

## 8.7.4 Phone Book

| Webpage   | Field Name | Description                          |
|---|------------|--------------------------------------|
|  <p>Picture 1</p> | Name       | Input the name                       |
|   | Number     | Input the phone number               |
|   | Ring       | Choose Bell Type for phonebook items |

| Index | Name    | Number   | Ring        | <input type="checkbox"/>            |

| 1     | admine  | 2345545  | Bell Type 1 | <input type="checkbox"/>            |
| 2     | tipait  | 78953    | Bell Type 1 | <input checked="" type="checkbox"/> |
| 3     | amgnain | 34       | Bell Type 2 | <input type="checkbox"/>            |
| 4     | peoti   | 85625246 | Bell Type 2 | <input checked="" type="checkbox"/> |
| 5     | qqwe    | 777899   | Bell Type 5 | <input type="checkbox"/>            |

Picture 2

### Steps :

#### Adding one phone book:

Step 1. Click **Add** button, and the configuration table like

Picture 1 will appear

Step 2. Fill in the value of parameters.

Step 3. Press **OK** button to end configuration.

Step 4. Press **Save Settings** button to save changes.

#### Editing one phone book:

Step 1. Choose one phone book

Step 2. Click **Edit** button, and the configuration table like

Picture 3 will appear

Step 3. Change the value of parameters.

Step 4. Press **OK** button to end configuration.

Step 5. Press **Save Settings** button to save changes.

#### Deleting one phone book:

Step 1. Choose one phone book

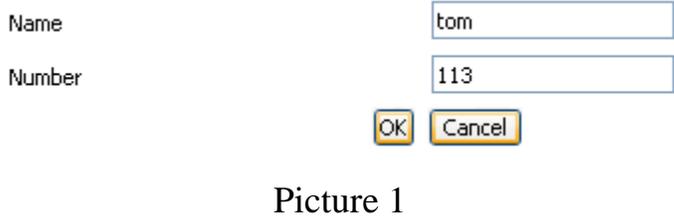

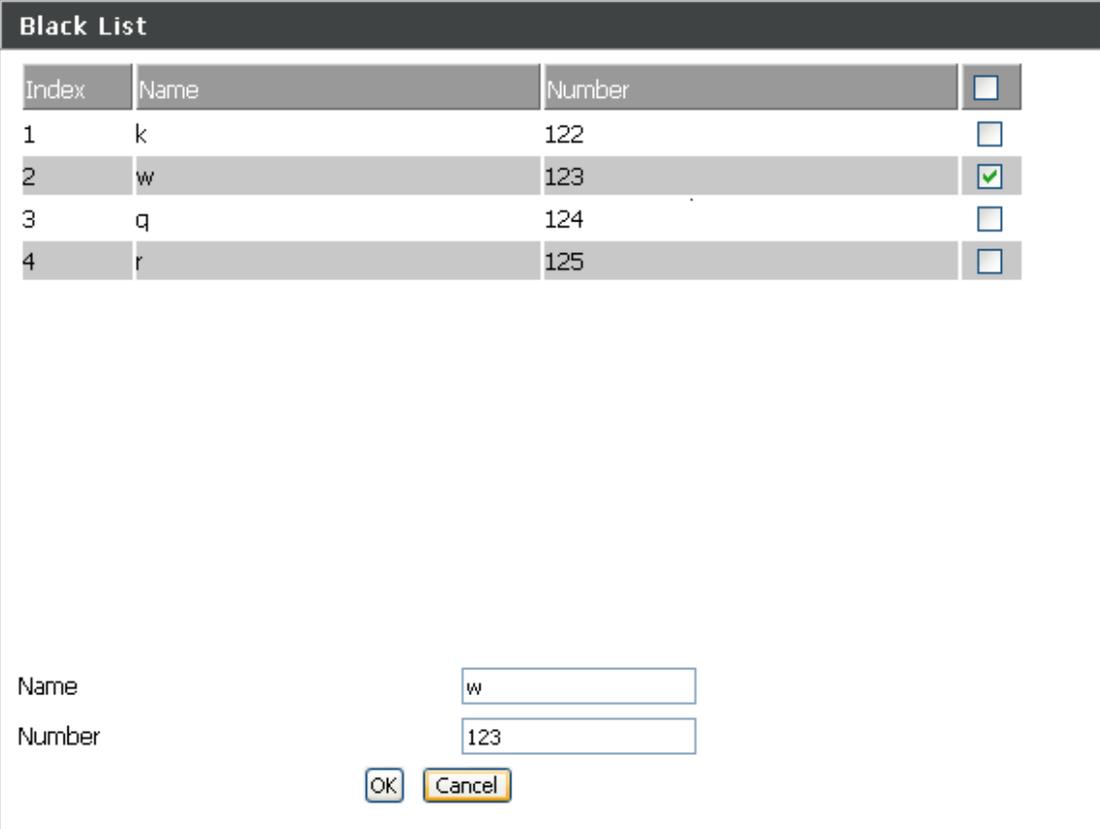

Step 2. Click **Delete** button to delete the phone book

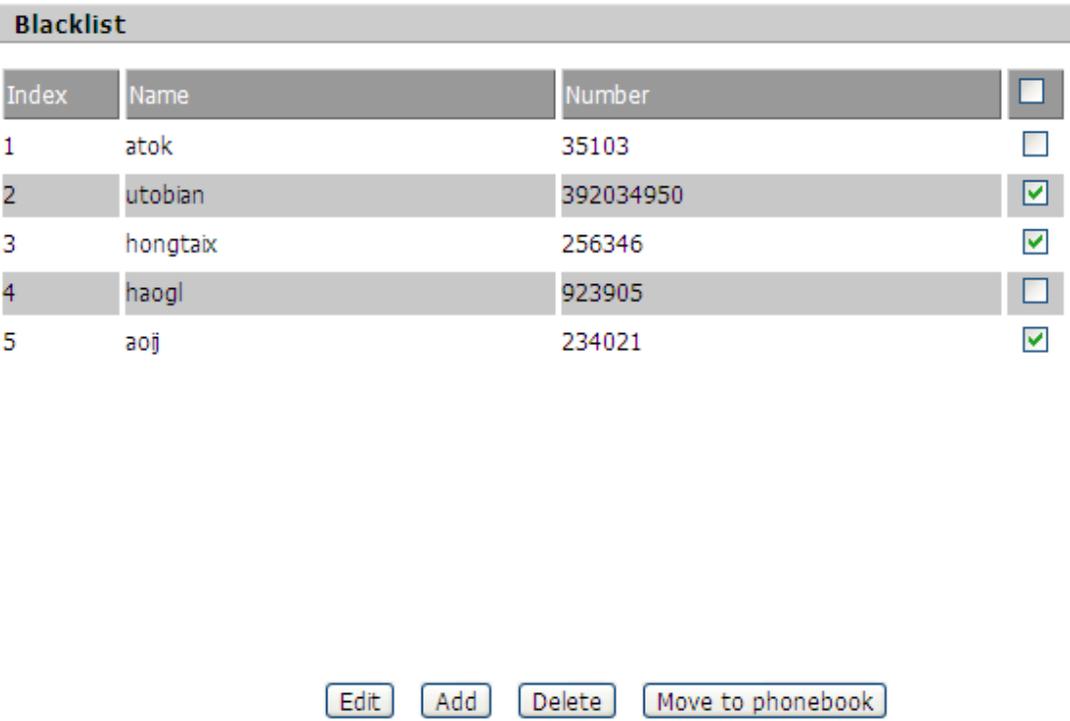

#### Move one phone book to Black list:

Step 1. Choose one phone book

Step 2. Click **Move to blacklist** button to delete the phone book

## 8.7.4.1 Black List

| Webpage  | Field Name   | Description    |
|--|--|----------------|
|  <p style="text-align: center;">Picture 1</p>  | Name   | Input the name |
|  <p style="text-align: center;">Picture 2</p> | <p><b>Steps :</b></p> <p><b>Adding one Black List:</b></p> <p>Step 1. Click <b>Add</b> button, then the configuration table like Picture 1 will appear</p> <p>Step 2. Fill in the value of parameters.</p> <p>Step 3. Press <b>OK</b> button to end configuration.</p> <p>Step 4. Press <b>Save Settings</b> button to save changes.</p> <p><b>Editing one Black List:</b></p> <p>Step 1. Choose one black list</p> <p>Step 2. Click <b>Edit</b> button, and the configuration table like Picture 2 will appear</p> <p>Step 3. Change the value of parameters.</p> <p>Step 4. Press <b>OK</b> button to end configuration.</p> |                |

| Index | Name     | Number    |                                     |
|-------|----------|-----------|-------------------------------------|
| 1     | atok     | 35103     | <input type="checkbox"/>            |
| 2     | utobian  | 392034950 | <input checked="" type="checkbox"/> |
| 3     | hongtaix | 256346    | <input checked="" type="checkbox"/> |
| 4     | haogl    | 923905    | <input type="checkbox"/>            |
| 5     | aoj      | 234021    | <input checked="" type="checkbox"/> |

Step 5. Press **Save Settings** button to save changes.

**Deleting one Black List:**

Step 1. Choose one black list

Step 2. Click **Delete** button to delete the black list

**Moving one Black List to phonebook:**

Step 1. Choose one black list

Step 2. Click  button to move the black list to the phonebook

Picture 3

## 8.7.5 Call Log

To view the call log information such as redial list (incoming call), answered call and missed call.

## 8.7.5.1 Redial List

| Redial List |      |        |             |          |

## 8.8 Administration

Use can manage the IP652 in these six webpage; you can configuration the Time/Date, password, web access, system log and so on.

### 8.8.1 Management

You can configuration the value of Time/Date, password, web access, and system log and so on.

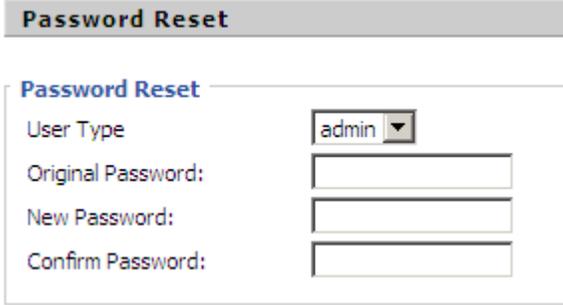

#### 8.8.1.1 Time/Date

| Webpage | Field Name           | Description  |
|---------|----------------------|--|
|         | NTP Server           | Fill in the NTP server IP address or Domain name                           |
|         | Time Zone            | Choose the time zone   |
|         | Manual Time          | Adjust time by manual  |
|         | Alarm Enable         | If or not enable alarm   |
|         | Alarm Time           | Set alarm time   |
|         | Daylight Saving Time | If or not enable daylight saving time.                                     |
|         | Offset               | Offset time, “-60” means advancing 60miniter, “60” means delaying 60minute |
|         | Start Month          | Choose starting month  |

|   |  |   |
|---|--|---|
| <div data-bbox="211 185 958 224" style="background-color: #cccccc; padding: 2px;"><b>Time/Date</b></div> <div data-bbox="219 259 353 291">Time/Date</div> <div data-bbox="223 297 917 963"> <p>NTP Server: <input type="text" value="time.bora.net"/></p> <p>Time Zone: <input type="text" value="[GMT+09:00]"/></p> <p>Manual Time: <input type="text" value=""/> : <input type="text" value=""/> : <input type="text" value=""/></p> <p>Alarm Enable: <input type="text" value="Disable"/></p> <p>Alarm Time: <input type="text" value="17"/> : <input type="text" value="40"/> : <input type="text" value="00"/></p> <p>Daylight Saving Time <input type="text" value="Enable"/></p> <p>Offset <input type="text" value="60"/> Min.</p> <p>Start Month <input type="text" value="March"/></p> <p>Start Day of Week <input type="text" value="Sunday"/></p> <p>Start Day of Week Last in Month <input type="text" value="Last in Month"/></p> <p>Start Hour of Day <input type="text" value="2"/></p> <p>Stop Month <input type="text" value="October"/></p> <p>Stop Day of Week <input type="text" value="Sunday"/></p> <p>Stop Day of Week Last in Month <input type="text" value="Last in Month"/></p> <p>Stop Hour of Day <input type="text" value="3"/></p> </div> | <p>Start Day of Week</p> <p>Start Day of Week Last in Month</p> <p>Start Hour of Day</p> <p>Stop Month</p> <p>Stop Day of Week</p> <p>Stop Day of Week Last in Month</p> <p>Stop Hour of Day</p>   | <p>Choose starting day</p> <p>Choose starting week</p> <p>Choose starting hour</p> <p>Choose stopping month</p> <p>Choose stopping day</p> <p>Choose stopping week</p> <p>Choose stopping the function hour</p> |
| <div data-bbox="310 1021 917 1106"> <p>Alarm Enable: <input type="text" value="Enable"/></p> <p>Alarm Time: <input type="text" value="17"/> : <input type="text" value="40"/> : <input type="text" value="00"/></p> </div> <p style="text-align: center;">Picture 1</p>   | <p><b>Steps:</b></p> <p><b>Alarm:</b></p> <p>Step 1. Enable alarm</p> <p>Step 2. Set alarm time, like Picture 1.</p> <p>Step 3. Press <b>Save Settings</b> button to save changes and then press <b>Reboot</b> button to active changes.</p> <p><b>Daylight Saving Time:</b></p> <p>Step 1. Enable Daylight Saving Time.</p> <p>Step 2. Set value of offset, like Picture 2</p> <p>Step 3: Set starting Month/Week/Day/Hour in <b>Start Month/Start Day of</b></p> |   |
| <div data-bbox="288 1214 900 1659"> <p>Daylight Saving Time <input type="text" value="Enable"/></p> <p>Offset <input type="text" value="60"/> Min.</p> <p>Start Month <input type="text" value="March"/></p> <p>Start Day of Week <input type="text" value="Sunday"/></p> <p>Start Day of Week Last in Month <input type="text" value="Last in Month"/></p> <p>Start Hour of Day <input type="text" value="2"/></p> <p>Stop Month <input type="text" value="October"/></p> <p>Stop Day of Week <input type="text" value="Sunday"/></p> <p>Stop Day of Week Last in Month <input type="text" value="Last in Month"/></p> <p>Stop Hour of Day <input type="text" value="3"/></p> </div> <p style="text-align: center;">Picture 2</p>  |  |   |

|  |  |
|--|--|
|  | <p><b>Week Last in Month/Start Day of Week/Start Hour of Day</b>, analogously set stopping Month/Week/Day/Hour in <b>Stop Month/Stop Day of Week Last in Month/Stop Day of Week/Stop Hour of Day</b>.</p> <p>Step 5. Press <b>Saving Settings</b> button to save and press <b>Reboot</b> button to active changes.</p> |
|--|--|

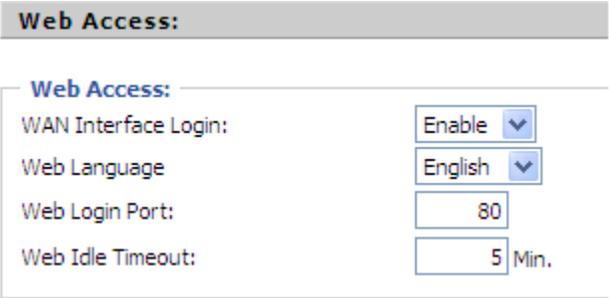

### 8.8.1.2 Password Reset

| Webpage   | Field Name  | Description                               |
|---|---|---|
|  | User Type   | Choose the user type from admin and user. |
|   | Original Password   | Input original password                   |
|   | New Password  | Input the new password                    |
|   | Password Confirm  | Input the new password again              |
|   | <p><b>Change the password of admin mode:</b></p> <p><b>Steps:</b></p> <p>Step 1. Choose the admin from the drop-down list.</p> <p>Step 2. Input original password, default setting is null.</p> <p>Step 3. Input a new password twice time in <b>New Password</b> and <b>Confirm Password</b>.</p> <p><b>Change the password of user mode:</b></p> <p>Step 1. Choose the user from the drop-down list.</p> <p>Step 2. Input original password, default setting is null.</p> |   |

Note: In admin mode, you can change the user password directly without the password of user mode.

Step 3. Input a new password twice time in **New Password** and **Confirm Password**.

### 8.8.1.3 Web Access

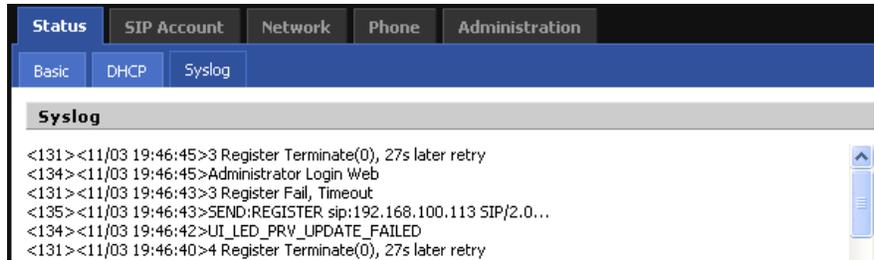

| Webpage  | Field Name          | Description   |
|--|---------------------|---|
|  | WAN Interface Login | If or not enable user login WEB via Internet port.<br>If enable, user can access Web to administration.               |
|  | Web Language        | Choose from English and Russian. The language setting will be effective in both Web and LCD.                          |
|  | Web Login Port      | Set the port which used to login WEB via Internet port and PC port, Default is 80, that is why URL should include 80. |
|  | Web Idle Timeout    | Set the web idle timeout time.<br>The web page can be logged out after <b>Web Idle Timeout</b> without any operation. |

### 8.8.1.4 System Log Setting

| Webpage  | Field Name    | Description  |
|--|---------------|--|
|  <p>Picture 1</p> | SysLog Server | Set the SysLog Server IP address or domain name for IP652.   |
|  | Log Level     | Choose log level from None/Error/Warn/INFO/Debug.<br>The priority changes from left to right, left is the lowest, right is the highest; the higher priority, the more information in syslog. |
|  |               | IP652 support local and remote Syslog.<br><b>In local:</b>   |

Picture 2

Picture 3

Step 1. Set **syslog server** null and choose one kind of **Log Level**.

Step 2. Press **Saving Settings** button to save and press **Reboot** button to active changes.

Step 3. User can view syslog in **Status/Syslog** webpage.

**In remote:**

Step 1. Fill in **syslog server** IP address or domain name

Step 2. Choose one kind of **Log Level**, like Picture 2.

Step 3. Press **Saving Settings** button to save and press **Reboot** button to active changes.

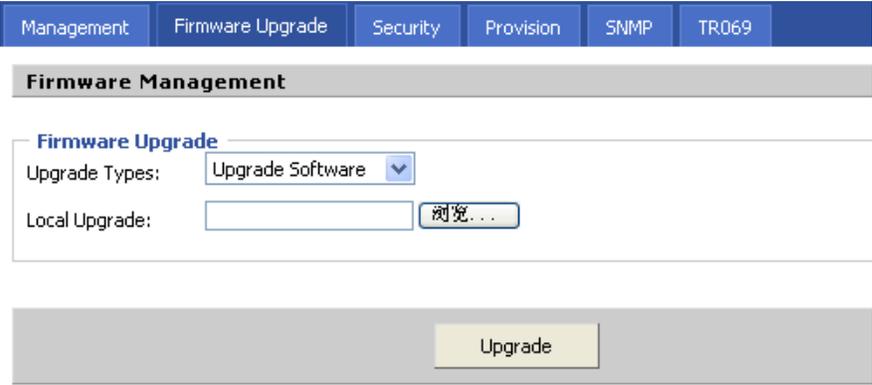

Step 4. User can view syslog in syslog server, and you can also view the syslog in **Status/Syslog** webpage.

### 8.8.1.5 Factory Defaults

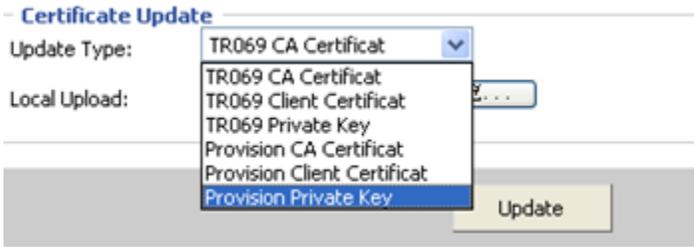

| Webpage | Field Name      | Description  |
|---------|-----------------|--|
|         | Factory Default | Press <b>Factory Default</b> button to set IP652 default. The basic default settings please refers to session <b>8.1</b> . |

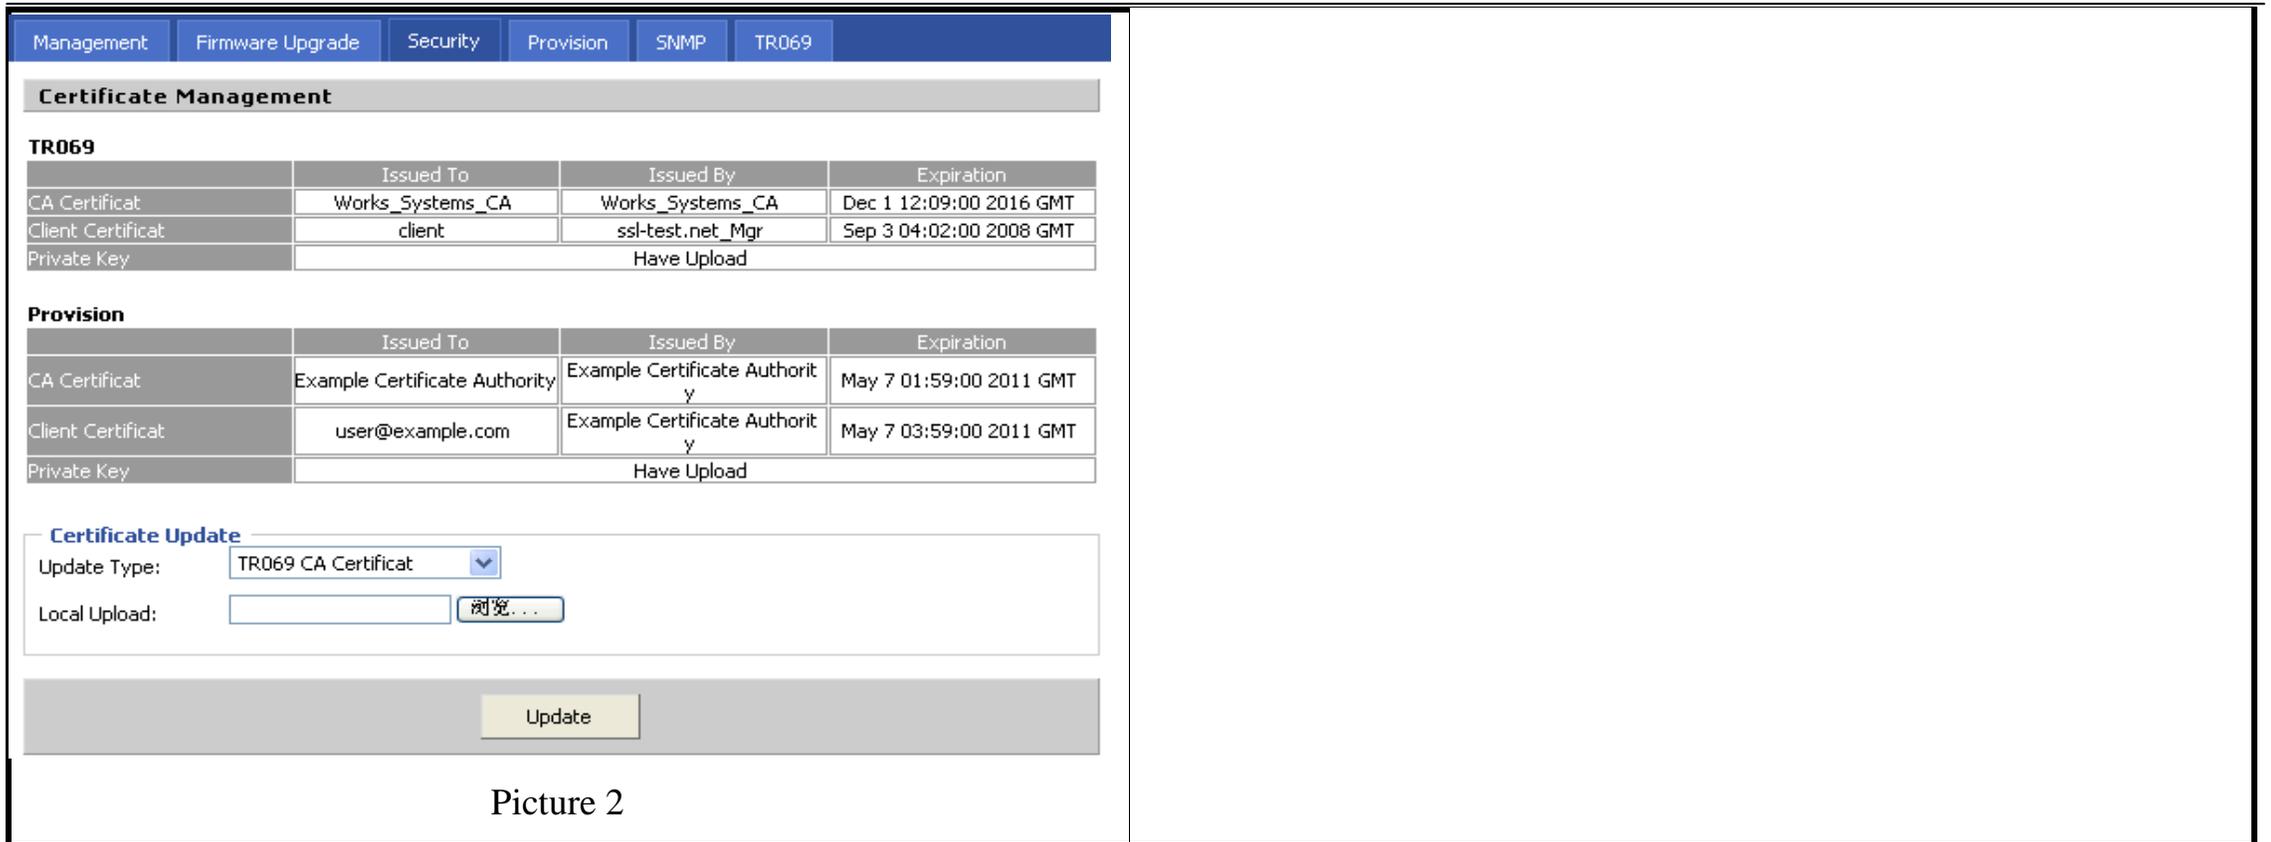

### 8.8.2 Firmware Upgrade

| Webpage | Description |
|---------|-------------|
|         |             |

|  |  |
|--|--|
|  | <p>Steps:</p> <p>Step 1. Choose a upgrade file type from Upgrade Software, Upgrade Ring Voice, Upgrade Dial Plan and Upgrade Config File</p> <p>Step 2. Press <input type="button" value="browser"/> to browser the upgrade file.</p> <p>Step 3. Press <input type="button" value="Update"/> to start upgrading, LCD will display the notice when upgrading.</p> <p>Step 4. Login web and then check the firmware whether well upgraded by viewing the firmware version in Status/Basic webpage.</p> |
|--|--|

### 8.8.3 Security

| Webpage   | Field Name                   | Description                              |
|---|------------------------------|--|
|  <p style="text-align: center;">Picture 1</p>  | TR069 CA Certificate         | The CA certificate file of TR069         |
|   | TR069 Client Certificate     | The Client Certificate file of TR069     |
|   | TR069 Private Key            | The Private Key file of TR069            |
|   | Provision CA Certificate     | The CA certificate file of provision     |
|   | Provision Client Certificate | The Client Certificate file of provision |
|   | Provision Private Key        | The Private Key file of provision        |
| <p>User can upload cert files for TR069 and Provision as follows:</p> <p>Step 1. Choose one File Type from <input type="button" value="TR069 Private ke"/>, like picture 1.</p> <p>Step 2. Press <input type="button" value="browser"/> to browser file.</p> <p>Step 3. Press <input type="button" value="Update"/> to start upgrading.</p> <p>Picture 2 is the webpage which all files have well uploaded.</p> |                              |  |

Picture 2

## 8.8.4 Provision

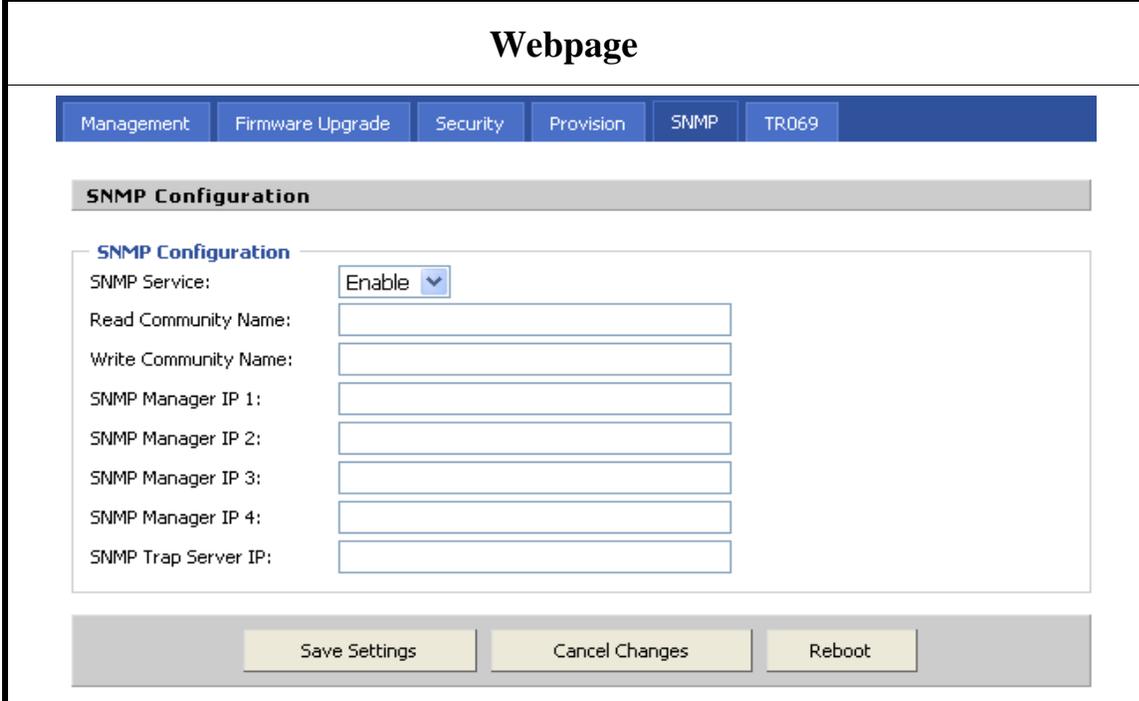

- 1) Provisioning allow IP652 auto-upgrading or auto-configuring
- 2) IP652 supports 3 ways to provision: TFTP, HTTP and HTTPS.
  - ◆ Before testing or using TFTP, user should have tftp server and upgrading file and configuring file.
  - ◆ Before testing or using HTTP, user should have http server and upgrading file and configuring file.
  - ◆ Before testing or using HTTPS, user should have https server and upgrading file and configuring file and CA Certificate file(should same as https server's) and Client Certificate file and Private key file
- 3) User can uploading CA Certificate file and Client Certificate file and Private Key file in Equipment Manage/Cert Manage page.
- 4) Details please refer to document Provision\_User Manual\_en\_v1.1.doc

| Webpage | Field Name | Description                |
|---------|------------|----------------------------|
|         | Provision  | If or not enable provision |

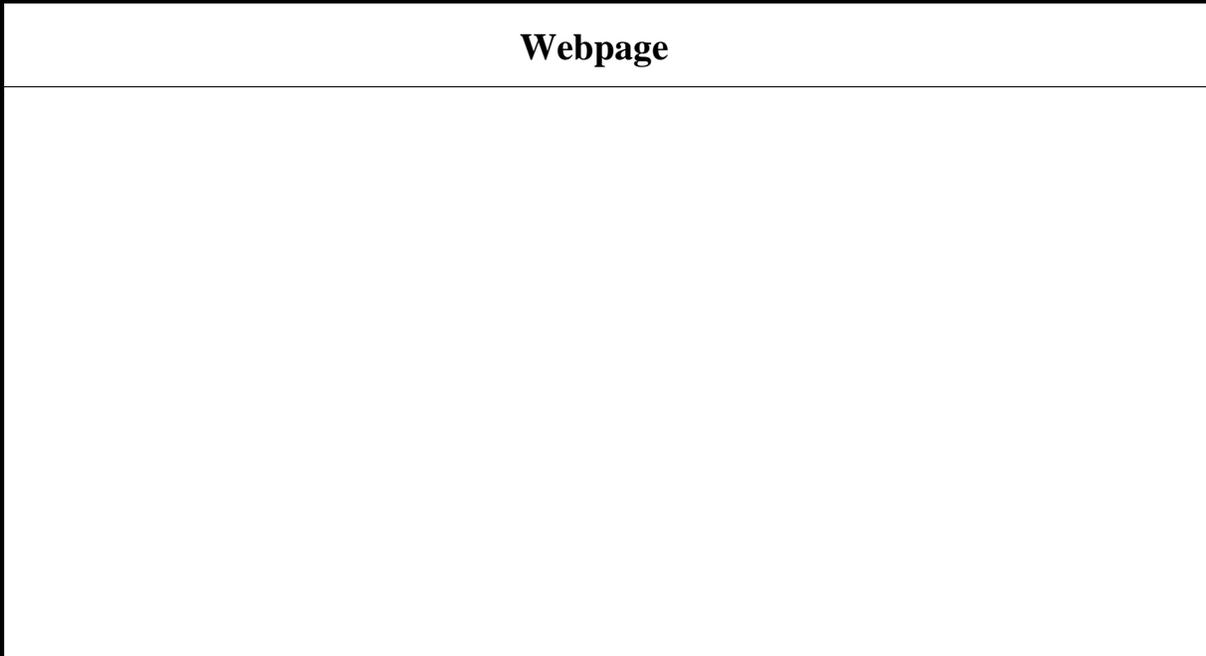

|  |   |         |  |                 |   |                     |  |                 |  |                          |   |                     |  |                              |   |          |   |            |                                 |              |                               |                       |  |                       |   |                 |                                    |                           |  |                     |   |

## 9 Troubleshooting

This section provides solutions to problems that can occur during the installation and operation of the IP phone. Read the following descriptions if you are having problems.

### 9.1 No Operation after Power On

**Solution:**

Check if the power adapter is properly connected.

If applicable, check if the PoE (Power over Ethernet) switch behind the IP phone is set correctly.

### 9.2 No Dial Tone

**Solution:**

Check if the handset cord is properly connected.

### 9.3 Can not Make a Call

**Solution:**

Check the status of your SIP registration status or contact your administrator, supplier, or ITSP for more information or assistance.

### 9.4 Can not Receive Any Phone Call

**Solution:**

Check the status of your SIP registration status, or contact your administrator, supplier, or ITSP for more information or assistance.

### 9.5 No Voice during an Active Call

**Solution:**

Check if the servers support the current audio codec type, or contact your administrator, supplier, or ITSP for more information or

assistance.

| Audio Configuration |        |                     |          |
|---------------------|--------|---------------------|----------|
| <b>Codec Setup</b>  |        |                     |          |
| Audio Codec Type 1: | G.711U | Audio Codec Type 2: | G.711A   |
| Audio Codec Type 3: | G.729  | Audio Codec Type 4: | G.722    |
| Audio Codec Type 5: | G.723  | G.723 Coding Speed: | 5.3k bps |
| Packet Cycle(ms):   | 20ms   | Silence Supp:       | Disable  |
| Echo Cancel:        | Enable |                     |          |

## 9.6 Can not connect to the configuration Website

### Solution:

Check if the Ethernet cable is properly connected.

Check if the URL is right wrote, the format of URL is: **http:// the Internet port IP address: 80, 80** must be added.

Check if your firewall/NAT settings are correct.

Check if the version of IE is IE8, or use other browser such as Firefox or Mozilla, or contact your administrator, supplier, or ITSP for more information or assistance.

## 9.7 Forget the Password

Default password of website and menu is null.

If user changed the password and then forgot, you can not access to the configuration website or the menu items which need password.

### Solution:

Factory default: press **Menu** button and choose **16Factory Default**, then a notice will appear, choose OK by using the corresponding softkey button.

If you choose factory default, you will return the phone to the original factory settings and will erase ALL current settings, including the directory and call logs.
