

Multiple work shifts. One headset system.

Plantronics Savi® 700 Series wireless headset system integrates desk phone, mobile and PC communications. The modular design allows shift workers to share systems – without sharing headsets.

COST SAVINGS

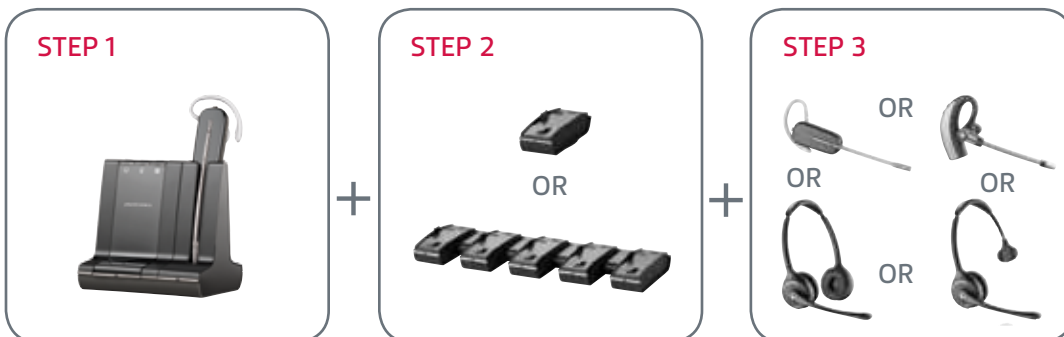

- No need to purchase full Savi 700 Series headset systems for every employee
- More economical way to add new headsets for new hires
- Less setup time
- A full recharge takes three hours, so three shifts can share one Savi 700 Series headset system

BENEFITS TO WORKERS

- Resolves hygiene issues as everyone has their own headset
- Users can choose the headset style that suits them best
- Less desktop clutter with one Savi 700 Series headset system on a desk
- Hot swappable battery kit lets users change battery mid-conversation – delivering unlimited talk time (Savi 740/745 only)

SAVI SHARE

Thanks to the modular design of the Savi 700 Series, shift workers, like contact center employees who share desks, can share a headset system without having to share their headset. You purchase only the number of Savi 700 Series headset systems you need for each desk – not for each employee. Purchase more headsets without having to purchase full Savi 700 Series systems, leveraging your total cost of ownership in a shift-changing work environment.

STEP 1
Purchase enough full Savi headset systems for the number of desks.

STEP 2
Purchase a charging unit for each system. Choose between a single Savi charge unit or a Savi charge unit for five headsets.

STEP 3
Purchase the number of headsets you will need. Your full Savi 700 Series headset system already comes with one headset and a removable charging cradle. Choose between four different wearing styles.

Savi® 700 Series

Multiple work shifts. One headset system. Every Savi 700 Series spare headset comes with a headset cradle. The headset and headset cradle fits into both the base and the spare charging unit, making recharging multiple headsets even easier. One shift can be wearing their headsets while another shift's headsets are being recharged. Furthermore, if shift workers are using the CS500® Series wireless systems, they can now charge their headset with the same spare charging unit that's being used with the Savi 700 Series headsets. Very savvy!
