MOTORIZED MONITORS

RET MONITORS SERIES

RET G LINE
RET A LINE
RET F LINE
RET L LINE

RETRACTABLE MOTORIZED MONITORS

State-of-the-art Retractable Motorized Monitors for boardroom tables made of anodized aluminium housing. We offer 4 different lines with different housing finishes. Monitors come with a silent, high-speed lift system. Monitor tilt can be adjusted to up to 20° according to user preference across all lines. Patented automatic cover plate opening system which avoids contact between the monitor housing and the aperture. Can be remotely controlled by serial RS-485 or RS-232 port. A full range of options are available.

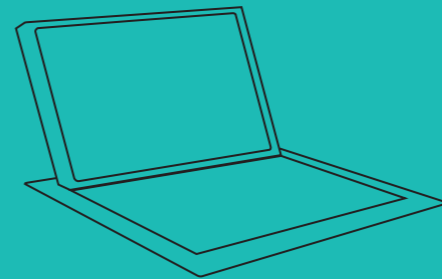

FOL MONITORS SERIES

FOL G LINE
FOL A LINE
FOL L LINE
FOL M LINE

FOLDABLE MOTORIZED OR MANUAL MONITORS

Elegant and high-end Foldable Motorized Monitors for boardroom tables made of anodized aluminium housing. We offer 2 different lines, and as with the retractable monitors, they also come with a silent, high-speed lift system. With just a 10cm box under the table, this product is perfect for those installations with limited space. Monitors can be remotely controlled by serial RS-485 or RS-232 port. A full range of options are available.

4

DES MONITORS SERIES

DES G LINE
DES H LINE

DESKTOP MANUAL FOLDABLE MONITORS

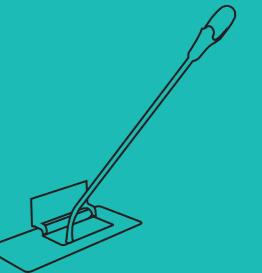

With an anodized aluminium housing, these monitors are the perfect solution for those installations where it is not possible to cut an aperture, or where only limited mechanization on the boardroom table is allowed. We offer 2 different lines and there are several available sizes.

RET MICROPHONES SERIES

RETRACTABLE MOTORIZED MICROPHONES

State-of-the-art Retractable Motorized Gooseneck Microphones for Boardroom tables. Select from a range of options including 4 different brands of microphone for a complete discussion system. Microphones can be remotely controlled by serial RS-485 or RS-232 port.

5

RETRACTABLE MOTORIZED MONITORS

RET G Line

Retractable Motorized Monitor for boardroom and meeting room tables. 20° **tilt adjustment** that can be set according to user preference. High-end anodized aluminium monitor housing with rounded corners. Protective glass with black border serigraphy.

Automatic opening system for the cover plate, avoiding contact between monitor housing and the aperture. If an obstruction is detected on the cover plate, the system stops and reverts the movement.

Monitor can be customized with different finishings.

VGA and DVI Inputs.
RS-232 serial control through DB9 connector.
RS-485/422 serial control through In/Out RJ45 connector allowing loop and addressing.

Built-in microphone option available, together or separate from the monitor.
