

SMARTest

SMARTest is the first pen style tester on the market. It is designed for convenience to the network professional. Its design is lightweight yet rugged, perfect for field jobs. The two button operations of SMARTest makes it quite easy to use and it's remote unit allows for testing of cables both before and after installation. SMARTest detects the following faults: shorts, opens, crossed pairs, reversal, and split pairs.

Features

- Detects open, short, reversal, mis-wire and even the split pairs
- Additional model is available with built in tone generator
- Button operation (2 buttons on model with tone generator)
- Interface with both RJ45 Socket (female) and plug (male) on main and remote unit to provide easy connection. Eliminates the need for cable adaptors
- Snap-on remote unit allows quick access and storage
- Low battery indicator
- Compatible with category 3, 4, 5, 5e, 6 and 7 cables
