

Product Change and Discontinuation

Omni Marker and Uni Marker

Summary

Last production of original Omni Marker and Uni Marker will be before end of 2019

Background

As you are aware, Tempo has now released the Omni Marker II. See getomnimarker.com for more details.

We will end production of the older models. As announced alongside the launch of the Omni Marker II, the last time build dates for the following Omni Marker products are already set:

- Water 30th September 2019
- CATV 15th October 2019
- Power 31st October 2019
- Sanitary 29th November 2019
- Gas 31st December 2019

The above schedule is subject to parts availability and customer demand. Please check with Tempo customer service for availability of these items and for other Omni Marker models not listed. As stocks of older models are depleted, we will offer to transfer your order to the equivalent Omni Marker II.

Uni Marker

Uni Marker, which uses the same manufacturing equipment as the original Omni Marker, will also be discontinued.

Last orders for all Uni Marker models must be placed with Tempo by 31st October 2019 with production dates not extending beyond end of December 2019. Currently there is no direct equivalent product, however, in many cases, Omni Marker II can be used.

Omni Marker II

For most customers, our new Omni Marker II represents a direct replacement for the original Omni Marker, please see the cross reference below for the new order codes for Omni Marker II.
